

**CO. SUPERVISORS
VOTE BOND ISSUE
ON \$188,000 DEBT****Decide to Wipe off Accumulated Bills as Creditors Crave Cash**

Lake County Board of Supervisors paved the way for a return to "I, y, as you go" government Wednesday by adopting a resolution to issue funding bonds for \$188,000 to meet outstanding bills up to July 1.

The plan was made possible last month when the general assembly at Springfield passed a bill permitting counties of less than 200,000 population to issue funding bonds to meet their indebtedness.

A completion of all debts owed by the county and allowed by the board showed that \$188,471.86 is needed. Merchants, tradesmen, blind and mothers' pensioners and county employees—some of them have claims against the county for more than a year—have been clamoring for payment by the county.

Under the legislative enactment, the funding bonds may be sold 20 days after public notice is given. However, if within 20 days after public notice is given in a newspaper, one-fifth of the voters file a petition opposing the bonds, the proposition may be put to a vote of the people. The resolution is composed of six sections outlining the indebtedness of the county at \$188,471.86, the need of funding bonds for \$188,000, the manner of issuing such bonds at 4 percent, the retirement over a period of years starting July 1, 1940, and ending July 1, 1955, and the form of public notice.

**Chicagoan Captures
State Archery Title
at Nielsen Tourney**

Sixty-four skilled bow-and-arrow marksmen were conquered last week when William (Ducky) Hausner of 2344 N. Kennebec ave., Chicago, released his second dart to pierce a one-quarter inch spot from a distance of 75 feet to win the state Belgian style archery championship.

About 400 enthusiastic spectators witnessed the ancient sharpshooting game which was staged on the green of Louis Nelson's barbecue at the intersection of Route 59 and Grass Lake road. The tournament, which attracted contestants from all sections of the middle west, was staged under the Belgian archery rules which consists of each marksmen taking a single shot at the target and continuing round after round until one of the number hits the mark.

Mr. and Mrs. Jas. Lamb and daughter, Betty Jane, Kenosha, were Sunday evening callers at the Joseph Smith home.

Dover, Delaware
Planned by William Penn in 1683, it was not until 1717 that Dover, Del., was laid out. Penn designed it to be the most important town of the County of Kent. In 1722 the state house, later the state capital and today the oldest edifice of its type in public use in the United States was built. In subsequent years Dover's "Green" came to be surrounded by handsome homes. Through the intervening decades these homes have slowly developed into museums of high standing, with their furniture, their fittings and their art.

Origin of Name "Scioto"
One version of the origin of the name "Scioto" says that it comes from the Indian word Seyo-toh, meaning "great legs," says the Cleveland Plain Dealer. This because of its numerous branches. Like many other rivers in early times, it had an embarrassing plurality of Indian names. The Wyandot name was Scioto, probably from oughscanoto, the word for deer, which favorite game of the Indians made their home along the stream. It was, however, chiefly known as the Scioto, meaning deer river.

Dogs' Temperature Higher
The normal temperature of dogs is higher than that of people. It is usually about 101 degrees. Young dogs and small ones have slightly higher temperatures than old and large animals.

That Patient Public
"I'm a friend of the people," said the man with a large voice.
"Yes," said Senator Sorghum. "But are you the kind of friend who is always wanting to borrow money?"

**Antioch Township
Assessment List
Swell This Issue**

This issue of The Antioch News consists of Three Sections which total Twenty-four Pages and contains the Tax Assessment Roll of Antioch Township.

Taxpayers are urged to check their valuations as this is a correct list of all Real Estate and Personal Property in the Township with the assessed value thereon as extended for the year 1935 and published as required by law.

It is recommended that any taxpayer who believes that his assessment is in error should file objection immediately with the Lake County Board of Review in the Court House at Waukegan, Illinois. This Board is set up purposely to hear objections and equalize assessed values.

**ROUTE 173 PAVING
NEARS COMPLETION****Most of Concrete Slab Is Finished; Only Intersection Work Left**

Taking advantage of favorable weather in the past week, the road builders on route 173 gap will have completed pouring concrete for the new road this week. The only cement work to be finished is paving the intersections of the new route at routes 54 and 59.

State Engineer James N. True, of Mundelein, who was assigned to the task, has overcome the problem of draining the soil which was not ideal for road building. An elaborate filling system was installed under most of the road-bed of the gap to make the conditions favorable, he explained.

It is estimated that with good weather conditions the cement work on the intersections will be finished in three weeks. Engineer True says that under the terms of the contract, there will be no detours and route 54 (Milwaukee ave.) will be kept open to traffic at all times. The present pavement at this intersection is to be removed and replaced with wider slab.

After the new road is open for travel, concrete gutters will be installed along both sides of the cement strip and the work of making the shoulders will be finished, according to present plans.

**Cub Baseball Players
Join Volunteer Force
of Antioch Fire Lads**

Freddie Lindstrom and Augie Galan, stellar fly-chasers on the Chicago Cubs baseball club, were made honorary members of the Antioch fire lads at their meeting.

Schools in Cellar
When children of Lapla, Cy the roof. Because of the rain below ground, and only the Arctic region, the sun never comes during midwinter, nor sets during summer.

**VILLAGE TRUSTEES
APPROVE \$14,800
AS ANNUAL BUDGET****Municipal Officers Get \$3,500; Fire Dept. to Cost \$2,100 as Major Items**

The cost of running the village government of Antioch for the next year was set at \$14,800 in the annual appropriation ordinance approved by the board of trustees at the July meeting.

With the exception of the salaries of the chief and firemen, all municipal officers will receive a total of \$3,500 for their work of running the village business. Maintenance and operation of the fire department will cost \$2,100 for the year and includes firemen's wages, repair and upkeep of the fire trucks, apparatus and equipment.

The amount of \$1,800 will be required for lighting the village streets, alleys and public buildings with an other \$1,800 for maintenance and operations of the water department.

Maintenance, repair and improvement of streets, alleys and sidewalks will require \$1,500 from the budget and public benefits in assessments against the village for local improvements amounts to \$1,500.

The rest of the money is appropriated among the following items: fees, wages and services of agents and employees, \$500; printing, stationery, books, office supplies and other expense, \$300; heating and operating costs of the village hall, fire and police station, \$250; maintenance and repair of sewers, sewer improvements and buildings, \$250; maintenance and repair of public buildings, \$500; and residuary and contingent funds, \$500.

**CHANNEL LAKE STOPS
LAKE VILLA IN 11TH****Westiders See Early 5-Run Lead Fade in 9th; but Win, 7-5**

Although the softballers from Channel Lake's part of the precinct had to labor into 11 innings to win 7 to 5, they were well-nigh ambushed at Lake Villa Tuesday when 4 tallies scampered over the plate in the 8th and 9th to chase their comfortable lead into a full tilt.

The CLACS turned on the heat to grab themselves a 5-run lead before the 3rd stanza was completed and continued scoreless until they took Reinbeck's offerings into the dark room to develop the two winning runs. Altogether they peppered the Lake Villa pitcher for 23 safe hits but he managed to keep them scattered for eight rounds.

Lake Villa's sluggers conspired against Ray Sorenson's offerings in the 6th to put their first run on the score-board, rallied in the eighth with the assistance of costly errors to things within an ace of tying and made the battle went into the overtime. The Channel Lake pitcher was stung with his pay-off ball and stopped Lake Villa's threat with tightened tossing. Box scores:

Several of the members of the Ladies' Aid attended the 76th annual summer assembly and camp meeting at the Methodist camp grounds at Des Plaines, Wednesday.

Mr. and Mrs. Herman Bock and Mr. and Mrs. Jim Barnstable of Chetek, Wisconsin, were guests of Mrs. Barnstable's brother, Daniel Longman and family at Trevor Saturday.

**KRAHL IS ONE OF 15
AMERICANS TO STUDY
CO-OPS IN EUROPE****Former Antioch Pastor Will Tour Europe With American Group**

A. M. Krahl, director of public relations for the Pure Milk Association, is one of a group of 15 representatives of co-operative associations and American universities who will sail on the liner California from New York July 19, for a tour of Northern European countries where the party will study the co-operative movement from a practical standpoint.

At Glasgow, Scotland, the group will spend four days in studying the methods of the Scottish Wholesale Society, an organization which employs 4,500 people and operates 14 factories. Then proceeding to Edinburgh they will learn of the great St. Cuthbert's Co-operative Association which operates creameries and truck farms.

At Manchester, England, the Americans will see in operation one of the oldest co-operative associations in the world, The Co-operative Union. It was in this city that the Rochdale co-operative was organized. Two days will be spent in London, and from there the group will go to Denmark for a study of the Danish Wholesale Society together with the folk schools and they will see the Danish co-ops in action. In Stockholm, Sweden, four days will be devoted to the study of the 340 stores, flour mills, bakeries, creameries and cheese factories, and at Helsinki, Finland, the Americans will have a session with the famous Elanto Society University and Educational Union which carries on all the public relations activities of the agricultural movement in Finland.

Of course, no co-operative study of Europe would be complete without getting into Russia, so the American party is planning to spend four days in Leningrad, the educational center of the Soviet Union, and five days will be spent in Moscow.

The entire trip has been planned in connection with the Co-operative League of New York, and Mr. Krahl, it is understood, is not making the tour in any way as a representative of the Pure Milk Association. The former Antioch pastor will be accompanied on the tour by his wife.

**Pregenger Dredges
Deepen Lake Marie**

Work of removing 60,000 tons of earth from islands in Lake Marie off the California Ice company's property, is progressing rapidly, according to Contractor Ray Pregenger who is using an hydraulic dredging machine for doing the work. This is the kind of work that has been needed in many of the nearby lakes and for which a state or federal appropriation has been sought for many years. Pregenger, several years ago, offered free use of his equipment to the state if such a grant could be obtained to finance the project.

**Seize Counterfeit
Gang in Hobo Camp**

Four "Knights of the Road" are alleged to have "made" money in their "jungle" near Woodstock, an arrest report by Sheriff Henry Nulle of McHenry county reveals. He raided a hobo camp and arrested the quartet he charged were making 25 cent pieces from stolen silverware. For a mold, he said, they were using clay, and for a ladle a contraption constructed from the top of a food bottle. They are being held for investigation by the "G" men.

**Upset Baby Carriage
Harms Channel Laker**

A tipped-over baby carriage resulted in an ugly torn mouth of the three year old son of Mr. and Mrs. J. B. Havland of Channel Lake Monday evening. When the carriage upset, a hook caught in the corner of the youngster's mouth, necessitating six stitches. Dr. H. F. Beebe, who was called, reports that the wound is healing nicely.

**Cut Those Weeds;
They're Nuisance**

Persons permitting Canada thistles and sow thistles to grow are subject to arrest and fine under charges of maintaining a nuisance, warns thistle commissioners of the county. They declare that all property owners and renters must cut these noxious weeds at once.

Mr. and Mrs. Herschel Gaston of Calumet City are spending a few days in Antioch the guests of Mr. and Mrs. H. B. Gaston.

**McMillen Starts
Wrestling Drive
For World Title**

Since Jim Londos was tossed from his lofty perch as champion heavyweight wrestler in his match with Danno O'Mahoney in Boston last week, "Big" Jim McMillen, the ace Antioch matman and leading contender, is ready to start a new campaign for the world's wrestling title.

Except for a debatable technicality in one recent match, the Antioch challenger is undefeated in more than 150 consecutive bouts and is now rated by wrestling commissions as number one contender for the championship. Although he has never met O'Mahoney, McMillen is confident that he can flatten the 22 year old Irishman and bring home the world's championship to Lake county.

Friday night will find McMillen climbing through the ropes for a finished match with Fred Grobmler, the Iowa scissors expert, as the headliner of the first all-star wrestling card to be presented in the new Haunted House open-air arena at Round Lake, Grobmler, while he defeated the Antioch giant eight years ago, is rated as one of the 15 leading pro wrestlers in the game, and is likewise eligible for a title match.

**GURNEE WANTS
FIRE DISTRICT****Judge Persons Grants Permission for Special Election July 23**

County Judge Perry L. Persons has granted permission for a special election to be held in Gurnee July 23 for the purpose of voting on the proposition to establish a fire district in that vicinity. The requisite number of voters' signatures was obtained by members of the Gurnee volunteer fire department.

Surrounding communities were quick to perceive the benefits and the extra protection afforded to rural districts when the Antioch department last year led the move to establish the first fire district in Illinois. Spring Grove department is also contemplating such a district, and Friday night Chief Stearns and Frank Huber of the Antioch department were called to that village to explain details of the project to firemen and town officials. It is understood that a petition will be circulated and the proposal brought to a vote at an early date.

Members of the Spring Grove department were guests of the local department here Tuesday night.

**Keynoters' Play,
"Daddy," Is Success**

Both from the standpoint of entertainment and attendance, the play "Daddy," presented by the Keynoters' Social Club of St. Peter's church, July 2 was a decided success, according to those who attended and the sponsoring committee. Many talented actors chosen from local talent had parts in the entertainment. Dancing followed the play.

So many requests have come to the committee members that the play may be repeated before the close of the summer, according to Charles Cernak, Jr., president of the Keynoters.

**Blast Long Lake
to Recover Body**

After dragging Long Lake for the body of Raymond Aleck, 12 year old son of Mr. and Mrs. Peter Aleck, 2851 W. Thirty-eighth st., Chicago, who drowned Friday when he fell from a rowboat, rescuers recovered the body Tuesday after blasting the bed of the lake.

Mrs. Adolf Pesat and sons, Harry and Adolf, are leaving Sunday for a few weeks visit at Sioux Falls, South Dakota, with Mrs. Pesat's mother, Mrs. Charlotte Loughlin and her brother, Harry Loughlin.

Miss Cornelia Roberts, who is attending the University of Illinois, spent the Fourth with her parents, Mr. and Mrs. Herbert Roberts and her sister, Miss Glenna at their Lake home.

Dr. and Mrs. R. D. Williams and daughter, Mary Lou, left this week for a trip to Iowa, Kansas and Estes Park, Colorado, for a visit with relatives.

Mrs. Elsie Schroeder and grandson, Billy Brand of Chicago are spending a few days in Antioch with relatives.

**MOTOR ACCIDENT
SMASHES LIFE OF
ANTIOCH MAN****Louis Longley, Hit by Auto Sunday Succumbs to Injuries**

"Death from injuries when struck by automobile while walking on street."

That was the coroner's verdict in the death of Louis Longley, 34, of Antioch who died Tuesday at the Lake County General hospital as a victim of an automobile accident on route 54 near the Antioch Township high school early Sunday morning.

At the coroner's inquest held in Strang's funeral home, witnesses revealed that Longley was walking south (with the traffic) on the right side of the road on his way to work with R. Stafford of Antioch when he heard the sound of a horn of an automobile driven south by Matthew Helte, 320 W. Goethe st., Chicago.

Helte, who was accompanied by Joseph Farina, 418 Beethoven pl., Chi and two girls, attempted to pass the two pedestrians after sounding the horn. In moving out to pass them, Helte's car was cut off by a truck traveling north, forcing it into the confused Longley.

With the aid of Antioch police, Longley was removed to the hospital by Helte where he died from internal injuries, severe concussions, multiple contusions and fractures of the right leg and ribs.

Last rites were held this morning (Thursday) from St. Peter's church with Rev. Francis M. Flaherty conducting the ceremony. Interment was in Mount Carmel cemetery. Mr. Longley is survived by his wife and three children.

HICKORY

Mr. and Mrs. Frank Barber entertained at dinner Sunday the following relatives: Mr. and Mrs. David Pullen and daughters, Margaret and Thelma, from Antioch; Mr. and Mrs. Elmer Pullen and children from Taylor's Grove, Mr. and Mrs. Almond Pullen and children from Waukegan and Mr. and Mrs. David Neveler and daughters from Union Grove.

Mr. and Mrs. Harvey Mann and family from Aurora, also Miss Josie Mann from Grayslake spent the Fourth at the A. T. Savage home.

Mr. and Mrs. Frazier Hollenbeck and daughters, Charlotte and Shirley May, from Norwood Park, and Miss Shirley Hollenbeck from Waukegan, also Mr. and Mrs. O. L. Hollenbeck held a picnic at Little Silver Lake on the Fourth.

George R. Thompson, who is working for the Public Service at Northbrook, was home Saturday and Sunday.

Mr. and Mrs. H. A. Tillotson and Mrs. W. D. Thompson spent Saturday morning in Kenosha.

Mr. and Mrs. Nels Gussarson and daughter from Chicago spent Sunday at Hugo Gussarson's.

Miss Caryl Tillotson visited Ruth Ames of Gurnee from Tuesday until Friday.

Mr. and Mrs. Leo Thompson of Wheeling visited Sunday afternoon and evening at the George Thompson home.

Mrs. Archie Brewer, Mrs. Frank Cremin and daughters, Ruth and Cora from Rollins, visited the John Crawford family Sunday afternoon.

Mr. and Mrs. R. E. Eddy of Waukegan, called on Mr. and Mrs. Max Irving, Sunday afternoon.

Paul Nielsen from CCC camp, Milwaukee, spent the latter part of the week with his folks here.

Mrs. Mattie Edwards and Mrs. John Dickey and children from Forest Park, also Mr. and Mrs. D. B. Webb and Mrs. Frank Edwards from Millbun, called on Ms. Haie Tillotson Monday afternoon.

Mr. and Mrs. George Olsen from Waukegan spent the Fourth with Mr. and Mrs. Max Irving and sons.

Mr. and Mrs. Philip Gould, Norman, Eleanor and Vivian, of Grayslake, called on George Thompsons Tuesday evening.

Miss Norma Cannon of Gurnee is visiting her aunt, Mrs. Gordon Wells, for a few days.

Mr. and Mrs. Paul Gaylord and friends, Mr. and Mrs. Kessler of Maywood spent Tuesday of this week at the Curtis Wells home.

Alfred Peterson of Chicago called at Curtis Wells' Tuesday evening.

Mr. and Mrs. Joe B. Keller entertained Mr. and Mrs. Robert Runyard and Mr. and Mrs. Earle Skiff July the Fourth evening.

Mr. and Mrs. Jim Barnstable of Chetek, Wis., are visiting relatives in Antioch.

PROMOTING CONFIDENCE

In its current monthly survey, the Guaranty Trust Company of New York says the death of NRA has helped free business of the fear of punitive measures and has promoted confidence that is the foundation stone of recovery.

"The attitude of government toward business should be one of constructive assistance, not one of restriction," it stated.

"The time has arrived not to alter our constitution but to permit business to solve its own problems, as it has in past depressions, free from political domination that has spread uncertainty, undermined confidence, and brought discouragement.

"Certainly by this time it should be realized that the government's hurriedly conceived plans to accomplish both recovery and reform by the same stroke not only have been unsuccessful but have led to such confusion and have so weakened the confidence of business men that they have largely defeated their own purposes and have prevented natural recuperative forces from asserting themselves.

It is also time for the people of the nation to call a halt to reckless government spending. . . . We have had two years of planned economy and wholesale government spending, which have discouraged initiative and private business and have placed heavy burdens, present and future, on the shoulders of the taxpayers.

"In proportion to the cost the gains in business during the last few years have been exceedingly small. . . .

"To what extent private business will be permitted to play a leading role in the process of recovery depends of course, on future legislation; and the more cautiously the government proceeds, the more confidently private business will go ahead."

The survey characterized the Supreme Court's recent ruling as "one of the momentous decisions of the Court's history. . . . It reaffirmed the fundamental principles upon which this nation was founded and gave assurance that . . . bureaucratic planned economy cannot prevail against the Constitution.

"Unless further restrictive legislation is attempted in defiance of the principles laid down by the Supreme Court, natural recuperative forces may assert themselves with less hindrance than in the recent past."

THE SEEDS OF PROGRESS

The only worthwhile progress comes from efforts of the individuals concerned.

The farmer is learning this truth.

The much-heralded government relief program may not have collapsed—but it has certainly not justified the high hopes that were held out for it.

On the other hand, organized groups of farmers are showing agriculture what can be done through their own work, their own thought, their own tenacity.

During the depression real and permanent farm

progress has been made—by farmer-owned, farmer-controlled cooperative marketing associations.

These associations have gained in membership. They have made striking progress in trying to balance supply and demand, and in forwarding more scientific production methods. They have disseminated information that individual farmers were not in a position to obtain. Result: A start toward farm recovery.

It has long been said that self-help is the best help. It is likewise the only kind of help that amounts to anything in the long run.

THE BILL IS COMING DUE

Have you ever noticed how easy it is to establish a charge or term-payment account in a department store? But no matter how easily the credit is obtained, or how small the payments, they come due regularly and if not paid—well, the law just takes its course and the debtor suffers.

The people of the United States are just now waking up to the fact that they have been on a gigantic spending spree. Never did they use their public credit so freely. But the day of reckoning is here. The charge accounts are coming due and the payments will have to be made.

Just as the unwary customer is talked in to spending more than he can afford by the super-selling ability of the expert clerk, so have an unwary people been talked in to spending more than they can well afford to pay, by the silver tongues of the politicians.

In the latter case, however, the people thought they were going to be given something for nothing—that the billions of dollars handed out in the name of "relief" and "recovery" would be taken from somebody else's pocket.

But the dream has ended. The tax-gatherer's hand is going right down into John Jones' pocket to take out the money to pay the charge account, for the "gifts" to Jones.

A new tax-raising bill has been thrown into the lap of Congress, that will have a tremendous effect on the earnings, the savings and the estates of every citizen. For camouflage and publicity purposes, it is designated as a "share the wealth" or "soak the rich" tax program. The Portland Oregonian says:

"This is but the beginning. . . . The government Santa Claus is about to be withdrawn. . . . Gradually he is to become overshadowed by another figure. This one will appear to the taxpayer ere he plays out his part, like a government Shylock. There is no other way.

"Good old Uncle Sam is going to make the rich pay and pay. Nothing is said about making other people pay. But that will come later. We are all going to pay—pay through the nose and pay till it hurts, in increased federal taxes down through the lower brackets. Our tax bill during the next generation is going to be a thing high, wide and handsome, and at the same time fearsome. It is not going to fall lightly anywhere. It is going to fall heavily on all who have incomes, in whatever brackets."

Charge accounts of the government (tax bills) become due just as do charge accounts of stores (private bills). There is no difference whatever in principle—but there is a great difference in fact, in that the government, if you fail to pay your tax bill, can use more harsh and ruinous methods on the individual to force payment than can the private store. There is no leniency shown by the tax collector. He collects your taxes, or he takes your property.

WILMOT

Mr. and Mrs. Martin Jerde announce the birth of a daughter, Dawn Arlene, on July 4th.

Mr. and Mrs. Fred Bowman announce the birth of a daughter, Nancy Ann, on July 6.

Mr. and Mrs. Earl Harm announce the birth of a son on July 8, Eugene Harold.

Mr. and Mrs. C. M. Anderson, Milwaukee, spent the Fourth with Mr. and Mrs. M. M. Schnurr.

The Girls' Klinton Ball team from Oak Knoll is sponsoring a dance at the Oak Knoll school on Friday evening.

Guests at the Runkel home on the Fourth were: Mr. and Mrs. H. B. Ketz, Lucille Smith, Kenosha; Mr. and Mrs. Rotherine and Mrs. Agnes Bushman, Burlington; Mrs. Clara Morgan, Dr. B. Roman, of Chicago; Howard Zorb and daughter, Mrs. L. Holdorf, Milwaukee; Barbara and Dick Zorb who spent the winter months in St. Petersburg with their aunt and uncle, Mr. and Mrs. R. Bartsch, returned to Chicago and were met by the Morgans and brought to Wilmot to return home to Milwaukee with their father, Howard Zorb.

Mrs. Harry McDougall spent the first of the week in Chicago.

Juanita and Shirley Myers, of Waukegan, are visiting their grandparents Mr. and Mrs. F. Beck.

The M. E. Aid is giving a lawn social on the Ivan Newell lawn Thursday evening, July 11.

There will not be any services at the M. E. church Sunday as the pastor, Rev. E. Kistler, is on his vacation.

Mr. and Mrs. Ernest Moyses of Tacoma, Washington, are guests this week of Mrs. Hannah Boulden and daughters, Mary Boulden and Mrs. M. Ballantyne.

Mr. and Mrs. Russell Montgomery and daughter Jean of Warren, Ohio, called at the Carey home Saturday. They had spent several days at Wisconsin Dells with Mrs. James Montgomery.

Mr. and Mrs. Thomas Fuson (Ethel Wright), New York City, were over night guests Monday at the Boulden home. Mr. and Mrs. Fuson are on a concert tour through the western states and left for Oconto Falls to visit Mr. and Mrs. Clarence Wright.

Mrs. Mary Wright of New York joined them there to continue the tour through the west.

The Wilmot Cemetery Association has purchased an acre and a half of ground from William Volbrecht for cemetery purposes. The association is having new roads built in the cemetery.

The annual bazaar and dinner for the Holy Name church will be held at the church hall on Sunday afternoon. Dinner will be served from four o'clock on.

Mr. and Mrs. David Kimball entertained thirty friends and relatives at a lawn picnic on the Fourth of July. Lorraine Boulden of Edison Park, spent the week-end with Joan and Martha Ballantyne. Her parents, Mr. and Mrs. E. Boulden, came for her on Sunday.

Mr. and Mrs. Charles Chultz were called to Salem Monday morning by the death of their father, Carl Richards.

Mrs. Jessie Paige of Evanston, and Miss Nelson, of Winnipeg, Canada, were week-end guests of George Hyde.

Dick Carey is at McHenry for a week with his parents, Mr. and Mrs. Walter Carey.

Rev. J. Finan is to go to Milwaukee on Wednesday. His sister, Miss Ellen Finan, will return with him.

Mr. and Mrs. Ray Buffon and George Hyde gave a picnic on the Fourth for Mr. and Mrs. W. Peterson and family, Kenosha; Mrs. Etta Winn; Mrs. M. Ballantyne and daughters, Mr. and Mrs. Ray Kinred and family, Belvidere; Mrs. Jessie Paige and son, Harold, of Evanston; Mr. and Mrs. Lynne Sherman and family, Warrenburg and Alfred Reynolds.

Grace and Ermine Carey were guests of Mr. and Mrs. J. A. Nolan over the Fourth at Oak Park.

Several ladies from Twin Lakes, headed by Mesdames Healy and Connolly are sponsoring a card party at the Red Barn for the Holy Name church on the afternoon of August first.

CCC Camp.

Capt. O. E. Dry has been transferred from the local camp to Company 699 at Skokie Valley. His place is being filled by First Lt. Perry C. Larson from the Skokie Valley camp.

Dr. Paul L. Singer, camp physician, was transferred on Tuesday to a camp in Oregon.

The men away on leave over the Fourth have returned.

Silver Center of Peralia

Isapahan, the old capital, is undoubtedly the most interesting city in Peralia. Although its population has declined from some 600,000 in the Seventeenth century to a mere third of that figure, the palaces, golden-domed mosques and gardens associated with its former splendor are still standing. It is the silver center of Peralia.

Bamboo Fast-Growing Plant

Bamboo, said to be "one of nature's most valuable gifts to uncivilized man," is the fastest growing of the higher plants. There is a species in Ceylon, the dendrocalamus giganteus, writes H. Wetmore, Tacoma, Wash., in Collier's Weekly, that frequently grows at the rate of one inch in every 90 minutes.

SHEEP TAKE PLACE OF CATTLE IN WEST

Famous Old Trails Now Have Federal Sanction.

Phoenix, Ariz.—The western trail herd have not passed, but today they are sheep and not cattle, with numbers driven regularly exceeding the count of the most famous old trails.

It's a fair pas, of course, to mention sheep and cattle in one breath (to a cattlemen), but the former still are featured in big drives—in fact the business of sheep driving has grown, while cattle are moved by rail.

It's largely a matter of very simple business.

Cattle lose weight when driven cross-country. Cows are valued not by the hoof, but by the beefsteak, with thick steaks bringing more money. The money crop of sheep is their wool, which can't be walked away.

So today some 300,000 complaining "woolies" are taking the long trek from southern pastures in and about the Salt River valley to northern Arizona, where they will wait out the summer at high altitudes whose ranges are not withered by the desert sun.

The business of trail driving has become a big industry. The government sets aside regular strips for sheep to follow as they go north and as they return south. Some make a round trip of 400 miles.

Trails followed are as old as the industry. They are picked originally because of advantages of feed and water, and once set by custom, received governmental sanction. Homesteading or scrip purchase of land in the sheep "strips" is forbidden.

The oldest of them recently blossomed out with a shiny new suspension bridge, which sheep weekly cross to avoid wetness and possible quicksand of the Salt river below.

Following the drives demands alertness and sacrifice of herders. Mountain lions are not a myth, but are plentiful in parts of the sheep range. Wild dog packs are a menace in the Salt river valley, and may kill scores in a night's bloody orgy. Coyotes are present everywhere, vigilant to take stragglers.

Stove Designer Becomes a Cook to Learn Needs

Cleveland.—It takes more than a pencil and an artistic eye to design stoves, washing machines and pan-cake turners, young Henry Dreyfuss, New York industrial designer, made clear here.

Before he can turn out a pancake turner that women will cry for, he has to know first how to turn pancakes himself, Dreyfuss said. The same thing applies to machines that do the family wash, ironing and hold the refrigeration unit for the week's market.

When the young designer redesigned a washing machine, he spent nine months with his sleeves rolled up, washing everything a housewife does. He caught his fingers in the wringer, tore buttons off pajamas, tore lace into shreds.

Now he is going through a siege of baking, broiling and boiling everything from potatoes to cakes, in the interest of more beautiful and efficient stoves.

Only thirty now, Dreyfuss began his career as a scene designer. He was art consultant for a large theater chain and won recognition with his settings for several Broadway productions, including "Fine and Dandy," "Strike Me Pink," and "The Last Mile."

Don't Own Chinese Wall

"My ancestors built a great wall to prevent invasion," said H. Ho, the sage of Chinatown. "As a heritage it was a failure. We do not even own the wall."

LAKE VILLA

Master Alan Mitchell of Chicago is with his grandparents, Mr. and Mrs. Joe Hucker, for a few weeks of the summer.

Mr. and Mrs. G. P. Plaisance of Webster Grove, Mo., were guests of Mr. and Mrs. Wm. M. Weber at their home from Thursday to Sunday and enjoyed seeing the sights of the beautiful lake region. They visited Lake Geneva on Saturday.

Mr. and Mrs. Edgar Kerr and children of Bloomington, Ill., and Mrs. Geo. Mitchell and daughter of Chicago came last Wednesday for a few days' visit with their parents, Mr. and Mrs. James Kerr. Mr. Mitchell is spending his vacation in Wisconsin.

Mrs. Inga Swanson visited friends in Waukegan on Monday.

Isaac Stackler and family are at their cottage on Cedar Lake for a greater part of the summer.

The DeSels family spent Friday in Evanston.

Miss Lena Nelson returned home Sunday evening from a very enjoyable vacation spent with relatives at St. Louis and Little Rock, Ark.

Mrs. Walter Paske suffered severe burns on her body last week when some hot grease was spilled, but is recovering nicely and able to be about.

Mr. and Mrs. Joe Escherich drove to Chicago on Sunday to visit relatives.

Lester Perry accompanied his father to Egin where he is employed and will spend the week with him there.

There were a number of accidents over the Fourth of July, though no one was killed here. A man whose name we were unable to learn, cut his foot on broken glass when he stepped into the lake off the park, and several stitches were necessary to close the wound. Howard Dibble and Harold Miller, who were driving north, collided with a car which was cutting in and out of traffic near the viaduct on Thursday night, and one man was cut by glass, but the boys were not seriously harmed. The little grandson of the Jurgens family was hit by an auto when he ran out into the street and he was treated for bruises, but otherwise unharmed.

Mr. and Mrs. Olson of Waukegan visited the B. J. Gallger family Sunday. Mrs. Olson is Mrs. Gallger's sister.

Mr. and Mrs. Clarence Miller of Chicago spent the Fourth with their parents here.

Word received from E. K. Hart of the Lake Villa bank, states that he is improving but will not be able to re-

sume his duties for some time. Mr. Roberts of Barrington is filling the place very nicely, and the man from Fox Lake was his assistant for a few days, but he was called to his home by business.

Mrs. Anna Pierce of Chicago is with her niece, Mrs. Frank Hamlin, for a few weeks.

Mrs. Homer Fawcett, nee Hazel Tweed, was injured Monday afternoon when she was thrown from the motorcycle on which she and her husband were riding on the road leading west from the village. She was driving when a tire blew out, throwing them off the road. She was cut about the head and her husband suffered bruises. She was taken to the hospital during the evening to ascertain by X-rays, etc., the exact extent of her injuries which were not considered serious.

The official board of the church met at the church basement on Monday evening and after enjoying a picnic supper together, discussed the affairs of the church. As the auditorium of the church is torn up and will have a new floor laid before placing the seats, the services will necessarily be held in the basement until the work is completed. Work is going on as rapidly as possible under the circumstances, and it is hoped that the work will be completed in a month or so.

The Royal Neighbors' Officers Club met on Tuesday afternoon of last week with Mrs. Oscar Douglas at her home and four tables of 500 were played, and one of Bunco.

The work of the local P. T. A. does not cease with the close of school, and on Wednesday afternoon, July 17, they will hold a card party at the Village hall to raise funds to carry on their work. The public is urged to help. Mrs. Hooper is chairman of the committee in charge.

The Lizard Canary

Though smaller than the Norwich, the lizard canary resembles the latter variety somewhat in build. "It is not so full in the neck or so large in the head, however. English breeders say that the first lizard canaries were brought to their country by the Hugonots when they fled from the continent, and these birds probably made their first journey to America via the British Isles.

Fish Must Have Air Bladder

An air bladder, internally placed, regulates the weight displacement factor permitting the fish to remain stationary at varying depths, without muscular activity. The air bladder is said to be the remains of what was once a lung, or additional arrangement for breathing.

SILKS DE LUXE

By CHERRIE NICHOLAS

The sentiment for high-quality fabrics is notably on the increase among women. This trend is particularly reflected in the demand for grand and stately silks reminiscent of the days in the long ago when silk was really silk. The beautiful lady pictured is wearing gorgeous silk taffeta in a warp print. If one were not told, one might think, at first glance, that this garment of queenly grace was one of the new full-skirted evening gowns such as Paris proclaims to the world this season. In reality it is a most glamorous bouffant evening wrap, which goes to show the out-of-the-ordinary things which designers are doing in way of formal fashions.

Veils Move Back

Hang your veil off the back of your hat if you wish to be both "different" and chic.

Allow for Expansion, Contraction

The effect of cold and heat on steel in bridge structures must be taken care of through a space that will permit expansion and contraction, or the strength of the structure would be impaired.

Lafayette Not Up on English

Although he traveled extensively among English-speaking people, Lafayette's knowledge of the English language was very limited.

TREVOR

Ray Pregoner, Grass Lake, was a Trevor caller Tuesday.

Lawrence Hanson, Milwaukee, spent Tuesday with his mother, Mrs. Minnie Hanson.

Mrs. Will Yopp and son, Grass Lake, visited her mother, Mrs. Louise Derler, on Tuesday and Wednesday.

Mr. and Mrs. D. A. McKay and niece, Miss Ruth Thornton motored to Chicago Wednesday where they visited their son, Harry McKay and family.

Mrs. Kermit Schreck and Mrs. Jesse Allen were Waukegan visitors Wednesday.

Ruth Pepper is attending summer school at Madison.

Miss Elvira Oetting, Madison, spent the Fourth with the home folks.

Mrs. Louise Zimmerman and Arthur Robinson, Forest Park, spent the Fourth with Mrs. Zimmerman's niece, Mrs. John Gever and Miss Evelyn Meyer.

Mrs. Howard Gau, Evanston, Ill., called at the Charles Oetting home Thursday evening.

Mrs. Lena Holmes and son, John, Chicago, spent the Fourth and the week-end with her sister, Mrs. Daniel Longman and family.

Mr. and Mrs. William Smith and children, Dosman, Wis., spent the Fourth with her mother, Mrs. Mattie Copper, and sisters, Pauline and Gertrude Copper and brother, Allen Copper and family.

Mrs. Luannah Patrick, son, Milton, and Mrs. Alice Terpin were Antioch callers Friday.

Miss Gertrude Copper returned to the General hospital, Madison, Friday for treatment.

Klaus Mak, daughters, Elva, Nina and Marie, spent the Fourth with the Pete Adelsen family, Kenosha.

Mr. and Mrs. Daniel Longman, son, Russell, and house guests, Mrs. Lena Holmes, son John, Chicago; Dorothy Hartnell, Milwaukee; Mr. and Mrs. Willis Sheen and Mr. and Mrs. Harold Mickle enjoyed a picnic dinner at the Charles Runyard home the Fourth.

Mr. and Mrs. Charles Hartnell, Milwaukee, spent the Fourth with the latter's parents, Mr. and Mrs. Daniel Longman.

Miss Sarah Patrick returned home Sunday afternoon after spending the past week with cousins in Farmer City, Illinois.

Mr. and Mrs. Jim Barnstable, Chetek, Wis., and Mr. and Mrs. Herman Bock, Antioch, called on Mrs. Barnstable's brother, Daniel Longman and family Saturday.

Elsie Sullivan, Chicago, is spending her vacation with her aunt, Miss Ruth Thornton.

Miss Hamer and cousin, Edward Kohlberg, Chicago, who are spending their vacation with their grandmother, Mrs. Ottila Schumacher, called Sunday on their aunt, Miss Tillie Schumacher and uncle, Pete Schumacher and family.

Miss Bernice Longman and friend, Miss Ruth McDuffy, Cross Lake, visited the home folks Sunday.

Eloise Allen, Twin Lake, spent Sunday with her mother, Mrs. Jessie Allen.

Mr. and Mrs. Lewis Pepper spent Sunday at Petriy Springs, where they heard Gov. La Follette speak.

Mrs. Al Martin and daughter, Betty, Waukegan, visited at the Charles Oetting home Saturday. Betty Jane remained for a week's vacation.

Mr. and Mrs. Charles Hartnell and daughter, Dorothy, returned to their home in Milwaukee Sunday evening after spending the week-end at the D. Longman home.

Mr. and Mrs. V. Holtdorf, Silver Lake, were Trevor callers Saturday afternoon.

Mr. and Mrs. Jas. Lamb and daughter, Betty Jane, Kenosha, were Sunday evening callers at the Joseph Smith home.

Planned by William Penn in 1683, it was not until 1717 that Dover, Del., was laid out. Penn designed it to be the most important town of the County of Kent. In 1722 the state house, later the state capital and today the oldest edifice of its type in public use in the United States was built. In subsequent years Dover's "Green" came to be surrounded by handsome homes. Through the intervening decades these homes have slowly developed into museums of high standing, with their furniture, their fittings and their art.

Origin of Name "Scioto"

One version of the origin of the name "Scioto" says that it comes from the Indian word See-yo-toh, meaning "great legs," says the Cleveland Plain Dealer. This because of its numerous branches. Like many other rivers in early times, it had an embarrassing plurality of Indian names. The Wyandot name was Scioto, probably from oughscenoto, the word for deer, which favorite game of the Indians made their home along the stream. It was, however, chiefly known as the Scioto, meaning deer river.

Dogs' Temperature Higher

The normal temperature of dogs is higher than that of people. It is usually about 101 degrees. Young dogs and small ones have slightly higher temperatures than old and large animals.

That Patient Public

"I'm a friend of the people," said the man with a large voice. "Yes," said Senator Sorghum. "But are you the kind of friend who is always wanting to borrow money?"

Yesterdays

News of By-gone Years in Western Lake County

Forty Years Ago

Mrs. Dr. Tombaugh, of Millburn, was a guest of Mrs. L. M. Hughes Tuesday.

Monroe Story visited Antioch relatives and friends during the fore part of the week.

Ernest Foltz of Burlington, visited his brother, C. O. and family Sunday and Monday.

Rev. Clarence Abel preached last Sunday in the afternoon at the Liberty Congregational Church, in the absence of Rev. Larkin.

Misses A. Davies, H. Bellanger, L. Devlin, and Mr. W. F. Meyer, chaperoned by Mrs. T. Wells and Mrs. T. J. Erwin, all of Chicago, enjoyed the dance at the opera house Thursday evening.

The Misses Annie Smith and Mabel Mason, came up from Prairie View, Tuesday of last week, to visit Mrs. Anna Drom, and returned home Wednesday. They made the trip on their wheels, being four hours on the road from Prairie View to Antioch.

Thirty Years Ago

Born to Mr. and Mrs. Andrew Lynch on Friday, July the 7th, a baby boy.

Mrs. Wilson of Milwaukee is the guest of Mr. and Mrs. J. C. James this week.

An event of unusual interest to the amusement seekers of Antioch will be the appearance at the opera house next Saturday night, July 15, of May Hosmer and her entire company from the Avenue theatre in Chicago. The company is spending its vacation in this vicinity and has been prevailed upon to give a performance before returning to Chicago.

Miss Susie Morley, A. N. Tiffany and Miss Deedie Tiffany took an automobile trip to Portage, Wis., the first of this week.

Fifteen Years Ago

Eugene Hawkins accompanied by his son, Percy, and his son-in-law Clayton Craft left Monday for New York State where they will look over the farm land that is being offered for sale in that locality.

Mr. and Mrs. Robert Trieger of Norwood Park and Mr. and Mrs. Donaldson of New York called on Antioch friends Tuesday.

Clara and Ruth Armstrong are visiting their aunt at Myrtle, Illinois.

Miss Viola Kuhaupt is home from Milwaukee for a week's vacation.

Ten Years Ago

Miss Edna Drom and cousin Frank Baber spent the past week with relatives at Chetek, returning home on Wednesday. They were accompanied home by Helen Baber, Frank's sister, who will visit relatives here for a month.

Mr. and Mrs. James Edgar and Mr. and Mrs. William Keenes of Chicago visited Mr. and Mrs. Knott over Sunday.

Miss Myrtle Haynes and girl friend of Chicago visited Antioch over the Fourth.

Mr. and Mrs. George Golwitzer motored to Rhinelander, Wis., for a few days' visit the first of the week.

The residence of William Hillebrand of South Victoria street was struck by lightning on Monday evening during the storm. Little damage was done.

Schools in Cellar

When children of Lapland go to school, they enter the building through the roof. Because of the severity of the climate the schoolrooms are sunk below ground, and only the rooftops are visible from the exterior. In this Arctic region, the sun never rises at all during midwinter, nor sets during midsummer.

ANNUAL APPROPRIATION ORDINANCE

AN ORDINANCE MAKING APPROPRIATIONS FOR THE VILLAGE OF ANTIOCH, COUNTY OF LAKE AND STATE OF ILLINOIS, FOR THE FISCAL YEAR BEGINNING MAY 1, 1935, AND ENDING APRIL 30, 1936.

BE IT ORDAINED BY THE PRESIDENT AND BOARD OF TRUSTEES OF THE VILLAGE OF ANTIOCH, COUNTY OF LAKE AND STATE OF ILLINOIS:

SECTION 1. That the following sums or so much thereof as may be authorized by law be and are hereby appropriated as herein specified for the corporate purposes of the Village of Antioch, County of Lake, State of Illinois, for the fiscal year beginning May 1, 1935, and ending April 30, 1936.

1. Salaries of municipal officers, (except fire-chief and firemen) \$3,500.00

2. Fees, wages and services of agents and employees, (except fire-chief and firemen) 500.00

3. Printing stationery, books, office supplies and expenses 300.00

4. Heating and operating costs of Village Hall, Fire and Police Station 250.00

5. Lighting streets, alleys, public buildings and places 1,800.00

6. Maintenance and operating costs of water department and water works 1,800.00

7. Maintenance and repair of sewers, sewer improvements and buildings 250.00

8. Maintenance and operation of fire department: (a) Salaries and wages of chief and members of such fire department \$550.00 (b) Maintenance, repair and up-keep of fire trucks, apparatus and equipment \$1,550.00

9. Maintenance and repair of public buildings 800.00

10. Maintenance, repair and improvement of streets, alleys and sidewalks 1,500.00

11. Public Benefits in assessments against the Village for local improvement 1,500.00

12. Residual and contingent funds 500.00

TOTAL \$14,800.00

SECTION 2. In addition to the foregoing sums and amounts the following sums are hereby appropriated:

1. Library Fund \$500.00

TOTAL \$500.00

SECTION 3. All unexpended balances of the appropriations for the year ending April 30, 1935, are hereby specifically re-appropriated for the same general purposes for which they were originally made.

SECTION 4. All ordinances or parts of ordinances in conflict herewith are hereby repealed.

SECTION 5. This ordinance shall take effect and be in force from and after its passage, approval and publication in accordance with law.

GEORGE B. BARTLETT, President.

ATTEST: R. L. MURRIE, Clerk.

Passed July 2, 1935.

Approved July 2, 1935.

Published July 11, 1935.

MILLBURN

Hickory Unit of Home Bureau will meet at the home of Mr. Lena Winters at Rosecrans Thursday afternoon, July 18. The major lesson, "First Aid in the Home," will be given by the local leaders, Mrs. Emmett King and Mrs. Robert Bonner. Miss Floy Dixon will give another lesson on Books.

Geraldine Bonner of Champaign spent several days with her parents the past week.

Mrs. D. H. Minto spent last week with her parents, Mr. and Mrs. Holloway at the Frank Bradley home near Racine, Wis.

Mr. and Mrs. Everett Hucker of Grayslake spent Thursday afternoon at the Macus Hoffman home.

Miss Jean Bonner will entertain the bridge club at her home Thursday afternoon.

Mrs. John Dickey and children and Mrs. Myra Dickey of River Forest are spending a few days at the D. B. Webb home.

Mrs. E. A. Martin and son, Richard, spent Monday afternoon and evening in Chicago.

Mrs. W. B. Stewart and Mrs. T. J. Anderson of Waukegan, Miss Mary Anderson of New York and Mrs.

"I'm Short of Cash, Jim, Sorry I Can't Help You."

Perhaps he is sorry. Anyway, is it fair to ask friends to "hold the bag" if you're "in the red"? Here's a plan that doesn't endanger friendships.

LOANS ON YOUR OWN SIGNATURE

To single people and married couples. No other signs or security. HOUSEHOLD LOANS to married couples keeping house. Only husband and wife sign. No inquiries of friends, relatives or merchants.

AUTO LOANS on liberal terms.

Full amount of loan is paid to you in cash. Repay in monthly installments to fit your income. Charges only for the time you keep the money. No payment due for 30 days. Call, write or phone for a private letter view. No obligation.

JAMES FAMILY ENJOY FAMILY REUNION

Over 90 people were present at the family reunion of the J. C. James, Sr., family, held in Milwaukee, Wis., Sunday, J. C. James, Sr., grandfather of J. C. James, Jr., and Mrs. Ida Osmond of Antioch, moved to Greenfield, Wis., in 1836. Those present from Antioch were: Mr. and Mrs. J. C. James, Jr., and family, Mr. and Mrs. William Osmond and family and Mr. and Mrs. Lester Osmond and family.

PAST MATRONS ARE ENTERTAINED AT SIMONS HOME

Mrs. Lloyd Murrie and Mrs. Monte Hinton entertained the members of the Past Matrons Club at the home of Mrs. Ernest Simons at Lake Marie Monday evening. Five tables were filled with bridge players for the evening. High scores were won by Mrs. Eva Kaye and Mrs. George Bacon.

MRS. GEORGE KUHAUPT ENTERTAINED BRIDGE CLUB

Mrs. George Kuhaupt entertained the members of her bridge club, Tuesday afternoon, at her home on Park avenue. Prizes were awarded to Mrs. John Brogan, Mrs. Frank Wood and Mrs. Viola Thompson of Lake Villa.

MRS. KAISER IS HOSTESS TO BRIDGE CLUB FRIDAY

Mrs. Sidney Kaiser entertained the members of her bridge club Friday afternoon at her home at Lake Marie. Prizes were won by Mrs. John Brogan and Mrs. Joseph Panowski.

MRS. WILLIAM ROSING ENTERTAINS 500 CLUB

Mrs. William Rosing was hostess to the members of her 500 club at her home on Main street this (Thursday) afternoon.

Habits of Somnambulists

Somnambulists may speak without acting, common in children and not usually considered somnambulant; act without speaking, the most common type; act and speak, more exceptional; and speak and have the senses of touch, sight and hearing. The last class merges into hypnotism.

Discovered Philippines

The Philippines were discovered by Magellan in 1521. They were conquered by Spain in 1542 and remained under Spain until the Spanish-American war.

Many French in Asia

French colonies in Asia number some 25,000,000 people.

Confessions—Saturday afternoons and evenings from 4 until 6 and from 7:30 until 9 o'clock.
Rev. F. M. Flaherty, Pastor.
Telephone Antioch 574.

CHRISTIAN SCIENCE CHURCHES

"God" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, July 7.

The Golden Text was, "There is none holy as the Lord: for there is none beside thee: neither is there any rock like our God" (1 Samuel 2:2).

Among the citations which comprised our Lesson-Sermon was the following from the Bible: "Jesus said, The first of all the commandments is, Hear, O Israel: The Lord our God is one Lord: And thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind, and with all thy strength: this is the first commandment. And the second is like, namely this, Thou shalt love thy neighbour as thyself. There is none other commandment greater than these" (Mark 12:29-31).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Dost thou love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind? This command includes much, even the surrender of all merely material sensation, affection, and worship. This is the El Dorado of Christianity" (p. 9).

EASTERN STAR LODGE ANNOUNCES CARD PARTY

The Eastern Star lodge of Antioch has announced a card party to be given in Masonic Hall, Friday, July 12th, at 8:00 p. m. Admission 25 cents and there will be a door prize.

Thirty-Foot Tree Ferns

Tree ferns in African mountains grow to a height of 30 feet.

Personals

Mrs. H. F. Beebe spent Thursday in Waukegan the guest of Mrs. Jos. Kohout.

Mrs. Ruth Harmon and Miss Helen Cribb were dinner guests of Dr. and Mrs. H. F. Beebe Sunday.

Los Crandall of Cable, Wis., spent the week-end in Antioch, with his family.

Little Miss Barbara Horton, daughter of Mr. and Mrs. Louis Horton of Waukegan, is spending the week with her grandparents, Mr. and Mrs. Joseph Panowski.

Mrs. A. J. Felter, Mrs. Clayton Fuller and Mrs. Virgil Felter spent Tuesday in Kenosha.

Mr. and Mrs. William Gray, Sr., and daughter, Mrs. Eva Kaye, left Tuesday morning for a visit at Oshkosh, Wis., with Mr. and Mrs. Herbert Pierce.

Mrs. Luannah Patrick and son, Milton, and Mrs. Alice Terpling of Trevor were calling in Antioch Friday.

Miss Florence Hood of Cicero was a guest of Mr. and Mrs. Herbert Roberts and daughter Glenna, Wednesday.

The regular meeting of the Legion Auxiliary will be held Friday night, July 15th, will be able to offer their readers an unusually complete selection of new fiction and non-fiction.

A new shelf of Mysteries and Westerns will be installed and will be restocked with different books every two weeks. All new fiction will be on the shelves on publication date.

Older books and books of nonfiction that are not in great demand may be requested and secured in a short time.

Rates will be ten cents for three days or less, three cents for additional days. On better books the rate will be five cents a day.

Colors of Great Dane Dogs

The Great Dane's color is one of five: fawn, brindle, black, blue and Harlequin. The latter is the rarest, as the color is hard to reproduce even though sire and dam of a litter of puppies are both good Harlequin specimens.

Women on Judge's Bench

Women take their places on the judge's bench in Moscow, Russia, exactly as they labor alongside men in every kind of work from digging subways to teaching in the university.

Few Surnames in Sweden

Surnames are not universally used in Sweden. Comparatively few peasants have surnames.

Radium Salts for Healing

Strange to say, it is not the pure elemental radium that is sold and bought. This, a white, glistening solid, visible in the dark, was first prepared only after the greatest difficulty in 1910 by Madame Curie. Fortunately it is not radium metal that is necessary for cancer treatments. In hospitals, it is grayish salt of radium, that looks like dirty table salt, which is used; radium bromide, perhaps, which contains chemically combined about 54 per cent of radium, or it may be radium sulphate. From the radium, speed extremely penetrating rays, more penetrating than X-rays, destroying morbid cancer cells, fibroid tumors and birthmarks.

Shoot From Right Shoulder

Most shotgun fans shoot from the right shoulder, and, in most instances, the right eye is the "master eye." However, observes a writer in the Kansas City Star, in many cases the left eye is the dominating optic and, when this condition exists with a right-handed shooter, difficulty in correct gun pointing is experienced. Such an individual, if shooting with both eyes open, is quite liable to "cross-fire" without knowing it, for although he believes he is pointing with the right eye it is the left eye which is registering the guidance. Such a shooter should close his left eye or learn to shoot from the left shoulder.

Electric Fishes

There are several kinds of electric fishes, but the electric eel is the only one known to hunt with electricity, notes a writer in the New York Herald Tribune. Upon nearing a fish it sends out a discharge which paralyzes its victim. It not swallowed the fish will recover in from ten to fifteen minutes. Electric eels were first described scientifically in 1729. Subsequent to that time they have been objects of superstition in their native South America, and have been used for medicinal purposes. Few scientific experiments have been carried on with them because of the difficulty of bringing them to this country.

Buffaloes Followed the Grass

In the days before the white man, immense droves of humped buffaloes would leave Texas, Arizona and New Mexico in the spring of the year and leisurely follow the grass, probably into Canada. When cool weather came they would retrace their steps. Before the advent of the railroad, Texas cattle men following the buffalo's lead, drove their herds over the old Chisholm trail. They found that by adopting the tactics of the nomads of the prairie they would be assured of bountiful grass by driving about ten miles a day, starting when the grass reached the peak of its greenness in Texas.

Cotton Not So Plentiful

In pioneer days in Ohio calico was a luxury sometimes purchased for a wedding dress at a cost of \$1 a yard. Silks, satins and laces were not even dreamed of.

Said to Be Unlucky

It is unlucky to shake hands across the table or to carry anything on the shoulder in the house.

Washington Laid Capitol Cornerstone
The cornerstone of the Capitol was laid on Wednesday, September 18, 1793, by George Washington during his second term as President. This was done with Masonic rites, following a Masonic procession from the "President's square" to the Capitol.

Many Visit Logan Elm

It is estimated that 10,000 persons annually visit Logan Elm under which Logan, chief of the Mingos, delivered his famous peace speech in 1774. This majestic elm stands below Circleville, Ohio.

Forest Management in Canada
Under intensive methods of silviculture the forests of France produce, on the average, 44 cubic feet of timber per acre each year; in Germany the average is 50 cubic feet per acre. While such intensive methods are inapplicable in Canada at present, it is estimated by the forest service department of the Interior, that, if the accessible and productive forest area in Canada were managed so as to produce even 10 cubic feet of wood per acre, it would practically replace the present annual depletion through cutting, fire, and disease.—Montreal Herald.

VACATION BUDGETS, PLEASE NOTE

Prices Greatly Reduced in a
Clearance Sale of Summer
Apparel

The great summer clearance begins. The best part of it is that the very things that vacation wardrobes need most are reduced. And equally "best" is the fact that this apparel is all so fresh-looking and so up-to-the-minute in style. Many excellent values are available; but come early—we urge you—or you may miss out on the very things you want most. Variety is great, but size and color ranges are incomplete.

LEFT-HANDEDNESS IS BRAIN MYSTERY

Light Thrown on Phenomenon of Ambidexterity.

London.—A former deputy commissioner of London's metropolitan police once half seriously suggested that a police car should be perpetually parked before 45 Hans place—so often did Scotland Yard require the services of the man who lives there. This man, also known as the "unofficial counsel to the C. I. D.," is Sir James Crichton-Browne, author of some novels based on paradoxes of legal medicine and serious works on nervous diseases, and vice president of the Royal Institution.

Just 27 years ago he concluded a lecture on "Dexterity and the Bond Sinister," at the institution with the words:

"We cannot get rid of right-or-left handedness try how we may. To raze out the written troubles of the brain is no easy matter; to delete its deeply engraven records is a task impossible."

Expert Elucidates.

A representative of the Daily Mail having recently read a report of the lecture through and failing to grasp it entirely called at 45 Hans place, thinking to catch Sir James napping. In one way he did, for Sir James had just been celebrating his ninety-fourth birthday. In another way, he didn't, for when he left he took with him an elucidation of the lecture of 1908 which, in the Daily Mail, reads in part as follows—an epic of its sort:

"Ambidextral culture, useful enough in some specially employed persons, must on the large scale tend to confusion."

"Right-handedness is woven in the brain and so is left-handedness, and to change the pattern you must unravel the tissues. My conviction is that as regards left-handedness it is well to leave well alone."

"I am interested to note, therefore, that our London school doctors who have been investigating the teaching of left-handed children have come to the same conclusion as that at which I arrived so long ago. Their memorandum just presented lays stress on the serious danger that may result from pressure in correcting left-handedness in children when it is either natural or well established."

"There are cases of genuine and permanent ambidexterity, notably that of Lord Baden-Powell, that benefactor of his country, who is accustomed to use both hands interchangeably."

"It has never been suggested that left-handedness or ambidexterity is indicative of any mental defect or incompatible with the highest intellectual power or with genius. Leonardo da Vinci was left-handed."

"Natural left-handedness is merely a transference of power from one side to the other, and acquired ambidexterity means the special training of certain groups of muscles and their springs in the brain for certain movements. It is all a matter of cerebral organization."

Mysteries of the Brain.

"The two hemispheres of the brain are not functionally symmetrical. In a vast majority of persons the left hemisphere is the more voluntary, the right the more automatic, but there is an occasional reversal of this arrangement."

"Now the hand and arm centers are adjacent to each other and closely linked with the speech centers in the brain, and it is a significant fact observed by the London school doctors that stammering is among the nervous systems induced by ill-judged efforts to correct left-handedness in young children in whom the evolutions of the brain centers are still going on."

"We have right and left-handedness everywhere. In the human subject it is well to accept it as it is, and make the best of it without attempting any futile, perhaps hazardous, transformation."

Christmas Card Takes

35 Years for Delivery

Philadelphia.—Madeline Adler posted a Christmas card to her sister Althea Rider back in December, 1900. The card was delivered in April, 1934, but Althea Rider is now Mrs. Althea Hagen, wife of the traveling secretary of the Philadelphia National league baseball team.

Cancellation marks on the card show it was stamped at 9 p. m. December 23, 1900, but post office officials had no explanation of where it had been for 25 years and four months.

Neither could they explain the delay of 25 years in the delivery of an Easter card to Miss Margaret K. Look, twenty-nine, who barely remembers the girlhood friend who lived just three doors away when she posted the card.

The postmark on the yellowed card, with the bunny picture almost worn away, was March 20, 1910. The signature on the card was "Dorothy Smith" who is now Mrs. Robert Miller and has two children of her own.

Dog Loses His Position

as Cattle Driver to Doe

Riley Brook, N. B.—On a farm near here a doe has taken over the job of driving cattle to water from a farm dog. A farmer found the doe abandoned near a roadside when it still was a pup. He raised it in his kitchen. It is now two years old.

The doe took on the job of driving the cattle herself and whenever the farm dog tries to dispute her place she charges him.

Let's join the shopping parade—the daily throng of thrifty buyers who shop in UPTOWN KENOSHA for Economy, Service and Convenience.

—UPTOWN—

Kenosha's whole west side business district comprises the section called "Uptown." The heart of this thriving commercial center is Kenosha's wide and spacious "White Way"—22nd Avenue. But uptown stores are located not only on the avenue but also on its busy cross-streets, Roosevelt Road, 63rd St., 60th St., and in all the neighboring territory.

EASY TO GET UPTOWN

"Uptown" is located on the West Side of Kenosha, close to the country.

It is miles nearer and more convenient for shoppers coming from west of the city. And there are no traffic problems—wide Uptown streets with their two hour parking ordinance do away with all the ordinary vexations of "driving to town to shop."

HOW DO WE GO TO UPTOWN?

Simply take Route 50 east to 39th Ave. Then continue east on Roosevelt road to 22nd Avenue and its adjacent streets. Uptown is so conveniently located on the West Side, and its hundred-odd up-to-the-minute stores offer so complete and varied an assortment of very type of merchandise that Uptown is the ideal place to buy.

ADVANTAGES OF UPTOWN STORES

Uptown is a low-rent business district. And Uptown passes its economy on to you with every purchase. The customer saves in Uptown. Moreover, Uptown stores are clean, modern, and well-stocked. Uptown salespeople are courteous and friendly. You will find what you want in Uptown at prices you want to pay, and in stores you will like to buy from.

-- THIS WEEK IN WASHINGTON --

By Cong. Ralph E. Church

Washington, D. C., July 6.—It would appear that the Congress is beginning to show a little independence of thought. The mere expression of a legislative wish by the President has usually resulted in its being promptly granted. Under the cry, "the President wishes it," thanks to the large Democratic majority, a bill would be passed with a minimum of delay and without any material amendments. On Tuesday, however, the Administration suffered a severe setback when the House refused to pass the President's bill which provided for the mandatory abolition of public utility holding companies.

It is significant that Representative Sam Rayburn, Democrat, of Texas, Chairman of the Committee on Interstate and Foreign Commerce, which has jurisdiction over the bill, voted against the President on this issue. It is also significant, I think, that Speaker Joseph W. Byrns did not follow his custom of voting in order to indicate his personal position on a measure, even though he need only vote in case of a tie.

The public utility interests have been bitterly accused and censured by the President for using every influence and pressure on the Congress in opposition to the bill. On the other hand, the President himself has used every influence at his disposal for its enactment. No administration has more at its disposal by ways of jobs and funds as a bait or whip for a recalcitrant Member of Congress than the present Administration.

Before the vote was taken on the bill, Representative John H. Hoepel, Democrat, of California, made the statement on the floor, "From a source which I will not divulge, it was brought to my attention today that the relief funds for California may be more liberal in the event I supported the President"; and immediately following the vote, Representative Ralph O. Brewster, Republican, of Maine, rose on the floor of the House and stated in part: "During the consideration of the death-sentence clause in the holding-company bill, Thomas G. Corcoran, Esq., co-author with Benjamin V. Cohen, Esq., of the bill, came to me in the lobby of this Capitol and stated to me, with what he himself termed 'brutal frankness,' that if I should vote against the death sentence for public utility holding companies he would find it necessary to stop construction on the Passamaquoddy Dam in my district." Inasmuch as Representative Brewster voted against the so-called "death-sentence," he said, "This statement on the floor of the House seems the only way to protect this project,

which means so much to the people of my State of Maine."

The result of these statements accusing the Administration of using various means to intimidate the membership of the House was the adoption of a resolution by both the House and the Senate for the investigation of lobbyist activities in connection with the bill. The resolution originally proposed in the House called for an investigation into the charges made by Representative Brewster, but it was promptly enlarged to include the activities of the public utility interests as well.

While we have been assured a fair and impartial investigation of the alleged activities of the President for the passage of the bill and the alleged activities of the public utility interests for its defeat, it is a fair presumption, in the practical working of things, that the result of the investigation will be a strong indictment of the public utility people. What Democratic member of Congress, with the rare exception, will appear before the Committee and testify that he had been made certain promises by way of jobs or project funds by the Administration if he voted "correctly"? How many Democratic members of Congress will be willing to place themselves in the disfavor of the Administration by testifying before the "investigating committee" that they received telephone calls from the White House or were interviewed by Charles West, former member of Congress and liaison officer of the White House? Even before the investigation begins I would hazard the guess that the Administration will be found "not guilty," whereas the public utility people will be judged guilty of all manner of lobbying activity in the halls of Congress. That would clear the Administration in the eyes of the public. It is, unfortunately, the way of "politics" and certainly is to be regretted.

The Constitution provides that neither the House or Senate may recess for three successive days in a single week without the consent of the other. In order to abide by the Constitution, at noon on Thursday, the 4th, Vice-President Garner mounted the rostrum of the Senate, promptly recognized Senator Joseph T. Robinson, Democratic Floor Leader, who moved that the Senate recess until Monday. There were four Senators on the floor to agree to the motion, and thus the Constitution was followed.

Likewise in the House yesterday there were a little over 50 of us present when the House was called to order and five minutes later adjourned until Monday.

Founder of St. Bridget Order
St. Bridget, called "the most famous daughter of the north," was the founder of the St. Bridget Order and built the first convent of the order in 1370 in the picturesque little city of Vadstena at Lake Vattern in central Sweden. When she died in Rome in 1373 her body was carried on foot all the way to the convent church in Vadstena, where it is still interred.

Cause of Suicide
A predominant cause of suicide among both civilized and savage peoples, according to one authority, is an accumulation of aggressive, destructive instinct in the race which cannot find an outlet otherwise. Thus it is less in wartime than during peace, when there is no way to express the pent-up aggressive energy by killing somebody else.

Hard to Tell Sex of Beaver
Sex identification of beaver is virtually impossible, except by dissection, and many veteran trappers who are ignorant of that circumstance identify beaver erroneously. It is the castor or scent glands of the beaver that are to be found on the animal while the gonads of both sexes are within the body.

Propulsion of Fish
Propulsion of a fish, for the most part, is derived from the posterior part of the body and the caudal fin, due to a series of alternate contractions of the strong muscles on the side of the trunk to the tail extremities. The tail moves to and fro not unlike an oar blade being used in sculling a boat.

"Coconut" Spanish Name
The coconut gets its name from the Spanish word coco, which means the face of a monkey. The word is applied because the three eyes on the coconut are so placed that a resemblance can be noted between it and a monkey.

How They Pick Locks
An odd, pistol-like tool is used by locksmiths for picking locks. A point inserted in the lock and vibrated by the trigger, works the tumblers of most locks to open position.

Mind and Body Must Be Busy
The human mind and body cannot be happy except in action. Even in our leisure our idea of fun is to find something extraordinary hard to work at—swimming, boating, tennis, ball games, etc., which work the body, or reading, bridge, solitaire, etc., which work the mind.

A Downy Encounter
"He's wrestling with his conscience."
"Yeah, a featherweight match."
Montreal Herald.

Brush on a New Roof!
THE best roof in the world must some day begin to show its age. But a single application of Carey Asbestos Fibre Coating will add years of service.

The National Housing Act enables you to have repairs made now and to pay the money back in easy monthly payments. Let us explain this simple plan to you.

The Percheron Breed
Some historians believe modern Percherons are mixed with Arabian blood introduced into La Perche by captive Arabian horses brought from the Holy Land during the crusades. Others say this had little if any influence on the Percheron breed, but admit that Arabian stallions were likely brought to France by homecoming crusaders.

Onion Trees
A tree, which smells exactly like green onions grows in Central America. The marines discovered it during their late occupation of Nicaragua. A low-flying plane skimmed the top of a tree and brought a torn branch back to Managua. Pulled from the wing fabric the twig gave off the powerful scent of green onions.—Washington Post.

Trains Stopped for Quinine
When the first railroad trains passed through Chillicothe, Ohio, the conductors were accustomed to stop and call out to the passengers, "Twenty minutes for quinine." This shows the prevalence of malaria in the lower Scioto valley in the early days and the measures taken to prevent its spread.

Stork Welcomes Bird
Throughout Europe the stork is considered a harbinger of good luck as well as of babies, and nearly every household hopes that a family of storks will build a nest on its chimney top when they return from Africa each spring. Some householders, living in districts no longer inhabited by these birds, even set up artificial nests and install wooden birds in them.—Collier's Weekly.

Lafayette Loved Dogs
The great Lafayette, one of the most famous magicians of the last century, so loved his dog Beauty that a portrait of the dog adorned all his checks and theater contracts. A picture of the dog hung outside his London home with the inscription, "The more I see of men, the more I love my dog."

Do Not Need Summer Time
The northern countries of Europe, such as Sweden, Norway and Scotland, do not adopt summer time, as daylight extends well toward midnight and starts again several hours later. Near the Arctic circle daylight is practically continuous throughout the summer time.

Before you order fuel

learn about low-cost GAS HEAT

Investigate our Special Summer offer—install gas heat now and pay nothing until October

Eventually you'll have modern, automatic gas heat. When your neighbors tell you of the joy and comfort that gas heat brings into their homes you'll want it, too. Then why not have it now? There's no need of putting off the day when you'll have this twentieth-century convenience. Before you order fuel, get the full facts on gas heat.

Now at low rates, every home—even the most modest—can afford gas heat. Rates for gas are now one-half of what they were in the 1930-31 heating season. And our special offer lets you try before you buy. We'll install it at our expense and you pay only \$3 a month rental during the first year for the equipment in the average home. This charge will be included in the bill for the gas you use. Use it for one month, two months or a year.

There are many reasons why you want gas heat. It ends days and nights of coal shoveling... of hauling ashes... chopping kindling... the anxiety of watching fires, setting dampers. Walls and drapes stay clean, free from dust, grime and soot. There is no more tracked-up dirt from the basement.

Don't delay—investigate TODAY

With gas heat a single match is your kindling pile for the year. You fire your furnace from your easy chair.

Now in effect **LOW COST** for Heating Homes with **GAS**

You Invest Nothing!

Without ONE CENT of investment by you, we install the most modern burner in your furnace or boiler. If you are satisfied, it stays. If not—and you are the sole judge—out it comes and your former heating system is re-installed—AT OUR EXPENSE. We make this offer because of our confidence in the perfection of gas heat.

Vegetables Healthful and Palatable

The home gardener is now beginning to reap the reward of his patient industry, and if he has planned well his table will be furnished with a wide variety of healthful, appetizing and nourishing food.

One reason for many persons not eating more heartily of fresh vegetables is a lack of attractive and palatable ways of cooking and serving them. And then, only a few persons ever make much use of certain vegetables that are not so well known as potatoes and beans, and yet are more nourishing and better to eat, when rightly cooked—and furnish a welcome change from the ordinary routine, of which we all tire at times.

In order to be good and do good, each vegetable must be properly cooked, and with vegetables, as with everything else, there are "best" ways for preparing.

Important things to Remember.

When boiling vegetables in hard water, allow five or ten minutes more for cooking than is mentioned in the recipes given here.

Always avoid overcooking vegetables, as this makes them tasteless and tough, as a rule.

The age and freshness of vegetable have much to do with the time required for proper cooking. Young and fresh-picked vegetables cook more quickly than old or long-picked ones.

Always boil vegetables in uncovered vessels.

When the weather is very dry, peas and beans require longer cooking than when the atmosphere is damp.

Cabbage, beets and carrots fresh from the garden require less cooking than those taken from storage in the winter time or those bought from the truck dealer when slightly wilted.

Always carefully wash all vegetables in clean, cold water before preparing for cooking.

Unless otherwise stated, all spoon measurements are rounded.

Always start vegetables in boiling water.

Cream Sauce for Any Vegetable.

The following recipe is for 1 quart of vegetables, and 1 quart usually is enough for four persons, with a correctly balanced meal.

1 rounded or 2 level tablespoons butter

1 rounded or 2 level tablespoons flour

1/2 teaspoon salt; dash pepper (white preferable)

1 teaspoon grated onion or 1/2 teaspoon grated nutmeg for extra flavoring

1 cup cold milk.

Put the butter in shallow saucepan over fire; when melted remove from fire; add flour and mix until smooth.

Return to fire and add cold milk, slowly stirring all the time. Add salt, pepper and flavoring—either the onion or nutmeg—and boil 3 minutes. If made thus it will not have to be strained.

Be sure to have butter, flour and milk at hand before you begin to make the sauce.

This sauce is the best of its kind for carrots, cabbage, cauliflower, celery, onions, galsify, turnips and any other vegetable one wishes to serve creamed.

Beets

The beet is a root, and while its leaves or tops are commonly thrown away, when cooked like spinach these make delicious "greens."

Beets have a high food value, in this particular ranking almost with string beans.

For pickled beets—wash 6 medium sized beets and boil until tender.

Cool in cold water. Remove skins. Cut into half-inch cubes; cover with half cup vinegar, 1 teaspoon salt, dash of pepper and 1 tablespoon sugar.

If beet tops are young, boil with a piece of bacon the same as kale or spinach.

When boiling beets to serve sliced with melted butter, never slice until after cooking, and just before taking them to the table.

Beets and Horseradish Relish.

1 quart boiled beets

1 cup grated horseradish

1/2 cup finely chopped onion

1 cup vinegar

1/2 cup brown sugar

2 teaspoons salt and 1/2 teaspoon pepper.

Wash the beets and boil 40 minutes or until tender. Skin cold water, then chop very fine; add horseradish and onion, vinegar, sugar and seasoning; mix and put in glass jar. This is very nice with cold meat, fish or oysters, and will keep a long time.

Cauliflower.

Among the most delicate and tasty of vegetables, and noted for its digestibility, is cauliflower. Persons fond of cabbage but unable to eat it because it is hard to digest may use cauliflower as a substitute. No vegetable is better adapted to the social dinner table.

Boiled: Removed the leaves from a head of cauliflower; place in a saucepan, stem down, cover with boiling water, boil 35 minutes, without draining; drain and cover with the sauce made as follows:

Sauce: Put 1 tablespoon butter in saucepan; melt; add 1 tablespoon flour; mix well; add 1 cup cold vegetable stock, stirring until smooth and creamy, and the juice of half a lemon. If the cauliflower is small the outside leaves can be boiled, chopped

Washable Silks of New Importance

By CHERIE NICHOLAS

WASHABLE silks have a new importance because of the wide variety of types which are fashionists. No longer is it simply a decision between a tub silk crepe and a washable silk shirting, now that so many new and intriguing weaves have entered the field of silks that launder.

First in the present fashion ranks are the new silk linens and the silk shantungs in versatile weaves. The silk linens closely resemble linen except that they have more luster, but being made of silk they have the natural elasticity of silk and therefore are easier to keep fresh and unrumpled. Then too, the new silk linens have the advantage of taking strong dyes easily and are at their loveliest in the vivid peasant colors which are so voguish this summer. They also come in some very smart modernistic prints. The latter favor bold plaids and geometric treatments, the technique radically different from that used on silk crepes.

For sports hats, beach and daytime bags, for belts and for separate scarfs, the checked and plaided silk linens are doing things with a dash and go that fits right in with the spirit of summer gaiety.

Silk linen is particularly to be commended in all white. Its smartness is evident in the two-piece suit to the left in the picture, which has a black skirt and a jacket-blouse of white silk linen. A polka dot silk ascot is worn with it.

The very attractive two-piece sports dress centered in the group is fashioned of a gold colored silk linen. The accordion pleated skirt allows for motion. The top is bloused and has alternate pockets, with mother of pearl buttons and a wide attached belt presenting chic style accents.

The oriental influence which is so apparent in the new mode is reflected in the popularity of silk shantungs for sportswear. The very newest shantungs are heavily ribbed. Both solid

color and printed version are shown in these sturdy outdoor wear, while in the softer types of prints a very supple light shantung is being used. See the effective model to the right in the illustration. It is made of a greenish-yellow silk shantung, with a shantung coat in orange and red regimental stripes.

A surprise entry in the washable field is mouseline de sole. One can find no prettier material than this sheer and dainty weave. While all mouselines are not washable, some very new versions just put on the market have been specially processed for washability. They come in plain weaves, also in types with delicate shadow self-color patterns, the latter proving irresistible when once you glimpse them.

Silk broadcloth is also a washable fabric that is being enthusiastically used in better-type active and spectator sportswear.

A revival of interest in the lovely washable silk damask and silk taffetas is also noted. Entirely new patterns are available this season, stressing especially clever nautical motifs, and a series of sports patterns showing different games.

Washable silk crepes now showing are enlivened by amusing little patterns in vivid colors on light grounds, showing articles of sports equipment such as golf tees, polo mallets, beach umbrellas and so on. As to the very fine-quality plain washable silk crepes they are made in well-tailored shirtwaist types with embroidered monograms on the scarf, bosom or sleeve.

© Western Newspaper Union.

The Cathedral of Cologne

The cornerstone of the great Cathedral of Cologne, Germany, was laid in 1248. In 1447 work ceased and was interrupted for 400 years, the structure being completed in 1880. The cathedral is considered one of the finest examples of Gothic architecture in Europe.

The Busy Queen Bee

The queen bee deposits the equivalent of her weight in eggs daily. Three days after these eggs, tiny as little pin points, are laid. During the following six days, a total of but 144 hours, these larvae increase 1,200 times in body weight.

No Barbed Wire in Detroit

There is a Detroit city ordinance prohibiting the use of barbed wire fences. It says in part: "No person shall construct or maintain a barbed wire fence partially or wholly around any area in any street, or in, on or along any street, or in front of any public square or place."

An Old Saying

Birds in the pattern of wall paper, curtains, etc., mean that your "riches" will take wings.

fine, mixed with the cream sauce and served around the cauliflower.

The vegetable stock may be either celery or rice.

Escalloped: Wash and boil the cauliflower until tender; separate and put into bakedish, cover with the cream sauce and a layer of bread crumbs, and bake in hot oven until brown.

Two tablespoon grated strong cheese can be sprinkled over top for a change.

INTRIGUING IDEAS FOR STREET WEAR

Coats in Dazzling Colors Go With White Frocks.

Some grand ideas in street and day-time clothes, all white or combined or contrasted with color, are the latest note in summer togs. White classics in smooth streamlines, with the short sleeved or sleeveless dresses expertly cut, tailored and fashioned with sharp inverted plaits in the skirtline. These are made of smooth semi-rough or stunning new rough weaves of the fashion hour.

Vivid colors are used for the dazzling short coats that top these models, a coral orange, a pencil blue, and Kelly green being the most spectacular. Some have dresses with the tops of navy blue embroidered with anchors, chevrons, and other nautical devices with the separate jacket of white; others have dotted neck bows, or yokes with the same dotted accents on the coat, or the same trick contrived with plaid or checks in chiffon, taffeta, or silk linen.

The smartest of all white suits are of new weaves in heavy silk, and the new smoothies in silk linen and shantung silk and the old time favorite of smooth silk crepe. It's the color combinations that make them the outstanding summer successes. And the separate jackets can easily be worn with other dresses of silk or cotton; some of them even go out nights as a silken top for filmy laces or crisp organzas of contrasting color.

SHEER WOOLENS

By CHERIE NICHOLAS

One of the most exciting developments in the summer wooleens, which are so smart this season, is the new wool taffeta. This charming material is really a glorified version of that old-time favorite, wool challis. It appears in small quaint geometric prints in white on dark grounds or in deep shades against white. It tailors perfectly in shirtwaist frocks of the street and spectator sports types and being equally attractive for active acceptance. The grand thing about this new wool taffeta is that it is as practical as it is good looking for it does not crush or wrinkle, holds tailored pleats in any weather and washes and irons as easily and satisfactorily as cotton. The gayest hues (it comes in a riot of bright colors) are colorfast. An important consideration for warm weather wear is that this summer fabric will not cling to the body, which makes it cool and comfortable. The picture shows a nicely tailored spectator sports frock for summer wear of the new wool taffeta—small white geometric figure on a red background (the voguish Dubannet red). The triangle scarf tucked in below the mannish collar, and the nail-studded leather belt are smart details.

Dressmaker Details Adorn

Latest Offering in Shoes

Shoes are decorated with all sorts of dressmaker details—in fact, many of them were inspired by actual dresses. Collars of white or pastel trim dark kid pumps, contrasting stitching is just as effective on shoes as on dresses, colored bows are flaking, eyelets popular and the wide use of white accents on frocks is repeated on navy, brown and black shoes. Even the frock with one-sided trimming effect finds matching footwear with decorations concentrated at one side. This new tendency to create shoes to harmonize with dresses is a vast help in assembling an effective wardrobe.

FLASHES FROM PARIS

Tailored lace gowns are smart. Evening gowns with scarf head-dress bespeak a new trend. Damson is a color prospect for fall. Reversible satin capes offer fine color possibilities. Mouseline de sole, chiffon and other sheers are lavishly tucked or shirred. Flowers in boas, in tiny muffs and in various novel expressions adorn the formal mode.

Wake Island

Wake Island lies between Midway and Guam. It is a coral atoll, four and a quarter miles long and two and a quarter miles wide. Within the reef line are three islands, sparsely covered with vegetation and inhabited by a host of sea birds.

Tea From China

The use of tea was first discovered by the Chinese in the third dynasty, at the close of the Han dynasty, and history is full of quaint legends regarding its inception. Though tea growing has been transplanted to almost every Asiatic country, the Chinese still claim that there is something in the climate and soil of that country that produces tea with special fragrance and flavor.

Snow and Flowers

In a country which shows such a great variety of geological formations as Switzerland, the seasons cannot be clearly delineated or their time fixed as elsewhere. Here winter and spring always overlap each other, so that ski fields and gardens in full bloom are neighbors, and startling contrasts are achieved by nature.

Meerschaum Is Stone

Meerschaum (the material from which some pipes are made) is not wood—it is stone. The word means "seaframe." It is a clay-like silicate of magnesia which, when thoroughly dry, will float on water. Meerschaum is exported from Eski-Shehr in Asia Minor, where it is dug from shallow pits.

Invention of Friction Match

The first true friction match was not invented until 1827 by a man named John Walker of Stockton-on-Tees, Durham, England. Ignition of sulphur and phosphorus by friction was discovered by Godfrey Hawkwitz in 1680, but it was 150 years before this discovery was applied to matches.

No Running Over Bridge

When, long ago, the city fathers of Luray built themselves a bridge across a nearby creek they must have built a flimsy structure. For they made a law, still on the statute books of the Virginia town, which stated that no boy "should trot or run across the bridge even if he were barefooted."

Two Sabbaths a Week

The Abyssinians are the only Christians in the world who observe two Sabbaths each week—Saturday as well as Sunday—and who have made a saint of Pontius Pilate, the Roman procurator who ordered the crucifixion of Christ, writes G. I. Barrows, Providence, R. I., in Collier's Weekly.

Gulls Destructive

According to investigation by the bureau of biological survey, certain species of gulls are destructive to other birds. Among these species are the black-backed and herring gulls, which break up the nests of elder ducks, terns, smaller gulls and other local birds.

Fish Can Taste

The taste in fishes is seated in the mucous membrane of the mouth and offers a fair sense of discrimination in the selection of food. The membrane is sensitive well out to the edge of the mouth and not confined to the tongue and mouth cavity.

Plywood Much Stronger

Five-ply plywood is said to be five times stronger than a single board of the same wood and thickness.

Danger to Animals From Weeds
Certain poisonous plants do not always carry the same degree of toxicity, or deadliness. Normally, they may be safe for animals to eat, but under certain growth and climatic conditions they may become extremely toxic. Other plants may always have some poisonous properties present.

Bounty Jumpers
During the Civil war premiums or bounties were paid for enlistments. Bounty jumpers were those who enlisted and deserted soon after they received the reward. Many of them enlisted several times under different names.

DANCE OF THE
DEVILKINBy THAYER WALDO
© McClure Newspaper Syndicate.
WNU Service.

FIBERG slapped an open hand down upon the inlaid desk top. "Listen!" he stormed; "this thing's gotta be stopped if we're to have any show on the lot—yours or mine?"

Garrison rose, shoved his chair back, and walked to the door. "Think I'll toddle along," he remarked laconically. "You gentlemen don't want me in on a private fight. See you later, J. L. If Cheval swoons, there's some smelling salts in my office."

He went across the lot toward sound stage 5. It was there that all the elaborate spectacles which never reached the screen—at least under the Zenith trademark—had been staged. The most recent of them, he knew, was now being rehearsed by Cheval's assistants, and some vague hunch urged him to pay a visit.

As he entered the building, a man he didn't know approached him, heading out.

The fellow wore a light overcoat, and beneath it something bulged. Seeing the publicity man, he attempted to slip hurriedly past. A fortuitousness in the movement attracted Garrison's notice.

"Hey—just a minute," he said, grasping the other's arm; "let me see your pass, if you don't mind."

The man put on an offended air. "Pass?" he echoed stiffly. "I'm

"But how do those vile Minsky brothers have the audacity to—" "Never mind that," Garrison cut in. "The important point is that every one of those numbers came out in a Minsky show just before we were ready to release, which means that somebody at this end's playing a little double cross."

Fiberg eyed him shrewdly and inquired: "Yes? So who?"

"If I had that answer," the publicity man snapped, "would we be sitting around here stewing our brains over it? I'm only trying to show you how we've got to tackle the thing."

Garrison rose, shoved his chair back, and walked to the door. "Think I'll toddle along," he remarked laconically. "You gentlemen don't want me in on a private fight. See you later, J. L. If Cheval swoons, there's some smelling salts in my office."

He went across the lot toward sound stage 5. It was there that all the elaborate spectacles which never reached the screen—at least under the Zenith trademark—had been staged. The most recent of them, he knew, was now being rehearsed by Cheval's assistants, and some vague hunch urged him to pay a visit.

As he entered the building, a man he didn't know approached him, heading out.

The fellow wore a light overcoat, and beneath it something bulged. Seeing the publicity man, he attempted to slip hurriedly past. A fortuitousness in the movement attracted Garrison's notice.

"Hey—just a minute," he said, grasping the other's arm; "let me see your pass, if you don't mind."

The man put on an offended air. "Pass?" he echoed stiffly. "I'm

sure I don't understand. I'm a guest here."

"Everybody who comes on the lot from outside," Garrison told him, "has to have one, unless he sneaks in. What's under your coat, by the way?"

Without replying, the fellow tried to jerk free. Garrison held on and pulled him toward the door. When they were outside he halted again and snapped:

"Now, listen; either you come clean on what you're doing here, or I turn you over to the studio police as a trespasser. Which'll it be?"

The man ceased struggling and smiled a trifle. "Very well; here you are. Nothing very desperate about this, is there?"

From the folds of his overcoat he withdrew a camera.

The publicity man gave a triumphant snort and seized it, exclaiming: "Well, well! So you've been snapping yourself some pictures, eh? I suppose they're just for the family album?"

"Perhaps," he fellow replied blandly. He was still smiling, confidently, and seemed to be enjoying the situation.

"And of course," Garrison pursued, "you don't happen to be in the employ of Minsky brothers?"

The other nodded without hesitation. "Yes, I am; why?"

"Because then you're going to have the unique honor of a little interview with Mr. Joseph Fiberg. Won't that be nice?"

"Very. I'm at your service."

Fiberg and Cheval were in the throes of heated argument when Garrison threw open the producer's office door. Both men turned and their words died at the sight of the stranger. Then Garrison led him forward, saying:

"Here's something ought to interest you, J. L. Allow me to present Mr. X. I met him coming out of sound stage 5 with a hidden camera. He admits taking shots of the stuff and that he works for Minsky. How does that sound for a hot tip-off on our mystery?"

Before Fiberg could respond, the man in the overcoat was speaking.

"Ah—this is indeed a pleasure, Mr. Fiberg. And this other gentleman—may I know—"

"Paul Cheval," cut in the dance director haughtily, "is it of any particular moment to you?"

"Most decidedly. I'm fortunate in finding you both together. I'd planned to seek separate appointments but our friend here seems to have helped matters along in a hurry."

"Say, just what is this?" Fiberg asked blankly.

"I'll come to the point at once. My name is Fletcher; I'm with the law firm that represents Minsky Brothers."

He pointed to the camera and went on:

"With these pictures as evidence, we purpose to file immediate suit against Zenith studios for one million dollars damages. I thought you'd like to know about it."

There was a second of stunned silence. Then Cheval, in a strained voice, cried:

"This is enough! I've listened to all the insane mouthings I can stand for one day."

He flung toward the door, but the man called Fletcher was there before him and blocked the way.

"One moment, please. Evidently this is a surprise to all but yourself. I'd thought it might be more complicated. You see, Mr. — well, Cheval—the little lady who worked at Minsky's as a chorus girl and furnished you the details of their dances has made a complete statement."

To the producer, whose face was slowly deepening in hue, he added:

"According to my information, Mr. Fiberg, you've been rather badly duped. This man whom you've engaged as a dance director appears actually to be an ex-student of the hooper named Izzy Montlovski, and the girl I spoke of his former partner."

Once more the room was momentarily soundless. Then the lawyer's voice, with a new tinge of amusement, said:

"What you do with him's not my affair, of course; but may I suggest discretion? After all, publicity about this might prove quite embarrassing—eh, Mr. Garrison?"

Finds Stars of Pleiades
Group Move Independently

Proof that each star in the Pleiades cluster moves independently of other stars in that group has been established by Prof. Jan Schlitt, head of the Columbia university department of astronomy. This contradicts previous observations indicating the Pleiades constitute a star cluster in which motions of individual members are exactly alike, according to a correspondent in the Chicago Tribune.

Professor Schlitt compared recently completed photographs with similar views taken by the same photographic telescope 67 years ago. He and his assistants were able to measure up to 0.0003 of a second of arc per annum the velocities or motions of individual members of the Pleiades with respect to each other.

Although the theory that there is motion among individual stars of the Pleiades and similar groups, has existed for a long time, Professor Schlitt explained, the motion was so silent that its existence has never been proved.

The accuracy of the Columbia calculations, he said, is a result of the long period of time over which the measurements extend.

In making those measurements, he pointed out, the university is carrying forward a project started in 1868 by Lewis Morris Rutherford, founder of the Columbia department of astronomy. He was the first astronomer to prove that positions of stars could be measured more accurately on a photo-

graphic plate than by the eye through the ordinary telescope.

Rutherford took more than 3,000 pictures of constellations with a photographic telescope which he built in 1868.

A Fippenny Bit

A fippenny bit was a Spanish half-real, a silver coin taken at 1-16 of a dollar. The term was used in Pennsylvania and adjacent states. Before an act of congress, February 21, 1857, caused the adoption of decimal coins and the withdrawal of foreign coinage from circulation, this coin passed currently for 6 1/4 cents, and was called in New England a fourpence ha-penny, or a fourpence; in New York a sixpence; in Philadelphia and Virginia a flip, and in Louisiana a playune. A bit was a small silver coin with a value of about 12 1/2 cents. The term was often used in referring to the Mexican real.

To Preserve Brushes

Good paint brushes deserve good treatment. Never leave your brushes in the paint pot. While painting sessions are on, keep the brushes in an old can filled with turpentine, but when the painting is finished, wash the brushes well in soap and water. Much of the paint can be squeezed out first with the hands, covered with newspaper. Very thorough washing is necessary; the hairs may have to be well worked or massaged in hot soapy water before all the paint is removed. Then brushes should be dried thoroughly.

Cheerful Walls Brighten Home

A housing expert points out that gloomy walls spoil the interior appearance of any home. It is possible very economically to repair, replace or cover the old walls. Paneling with wallboard or plywood in the living rooms, wainscoting in the dining room, kitchen or bathroom, plaster or wallboard in the bedrooms, will make the home look younger. In the attic and cellar new rooms may be added by a few partitions and by applying new materials over the unfinished wall surfaces.

Fireworks Producer

Looks for Big Year

Saint John, N. B.—The year 1935 will be a "booming" year, T. W. Hand, Canada's foremost "fireworks man," believes.

Although his efforts have gone up in smoke for 47 years, Hand is an optimist. He manufactures most of the booming crackers and whirring rockets which Canadians let loose at divers national, regional and local celebrations.

"The year 1935 will be one of the biggest celebration years in the last thirty," he predicts. "The king's silver jubilee celebrations in Canada, plus annual fairs and exhibitions, will set a record for illuminated shows this year."

Useless Things

Sheets are absolutely useless for a bed of coals; tooth paste won't have any effect whatever on the teeth of a gale; yeast won't make the sun rise and rollers are unnecessary for the shades of night—Washington Post.

Only One Maple Sugar Tree

About seventy varieties of maple trees are found in the world, but only one yields sugar in commercial quantities.

"MARK OF THE VAMPIRE"

The Magnetic Poles

The magnetic poles are the points on the earth's surface where the lines of magnetic force are vertical. They are the ends of the axis of the earth's magnetic polarity.

Stockholm an Attraction

Stockholm is a Mecca for visitors to Sweden. With its islands, peninsulas and inlets cradled by the Baltic sea and Lake Malaren, it is appropriately dubbed the Venice of the North.

Yellow Fever Parasite Mystery

The parasite causing yellow fever has never been found and described but it is known to be extremely small.

TAXPAYERS SHOULD CHECK VALUATIONS

A correct list of all Real Estate and personal property in the Town of Antioch with the assessed value thereon as extended for the year 1935 and published as required by law, is published in this issue.

It is recommended that any taxpayer who believes that his assessment is in error should file objection with the Board of Review immediately. This Board is set up purposely to hear objections and equalize assessed values.

Address: Board of Review,
Court House
Waukegan, Illinois

TAXPAYERS SHOULD CHECK VALUATIONS

It is recommended that any taxpayer who believes that his assessment is in error should file objection with the Board of Review immediately. This Board is set up purposely to hear objections and equalize assessed values.

Address: Board of Review,
Court House
Waukegan, Illinois

Forest Management in Canada

Under intensive methods of silviculture the forests of France produce, on the average, 44 cubic feet of timber per acre each year. In Germany the average is 50 cubic feet per acre. While such intensive methods are inapplicable in Canada at present, it is estimated by the forest service department of the interior, that, if the accessible and productive forest area in Canada were managed so as to produce even 10 cubic feet of wood per acre, it would practically replace the present annual depletion through cutting, fire, and disease.—Montreal Herald.

Theories About Cain's Wife

There are various theories about Cain's wife. Some students of the Bible claim Adam and Eve were not the first persons on earth but only the first named persons. Others regard the story of Cain as a composite of several traditions relating to different men named Cain who lived at different periods. Others suppose Cain's wife to have been a sister or perhaps a more distant relative. Genesis, chapter 4, verse 14, tends to support the first of these theories.—Detroit News.

Reredos in Architecture

A reredos in church architecture is usually the screen back of the altar which is adorned with sculptured work comprising the tabernacle, niches, statues and the like. In some great cathedrals in England, such as Durham, Winchester and Saint Albans, the reredos is a mass of elaborate carving which reaches nearly to the graining.

Tea Leaf Fortune Telling

If two tea stalks appear on the surface of a cup of tea they are to be placed on the back of the left hand and struck with the back of the right; if they remain unmoved on the left, or adhere to the right, then the one loved will remain true; but if one adheres and the other not she will be false.

Camphor Trees Grew High
Camphor trees sometimes grow to a height of 100 feet.

COAST GUARD'S JOB IN ALASKA VARIED

Service Lives Up to Motto "Always Ready."

Juneau, Alaska.—"Semper Paratus—Always Ready" motto of the United States coast guard, is most effectively carried out in the Alaska division of the service.

Guardmen are prepared, day and night, to rush food to starving villages, administer justice in remote communities, rescue crews of ice-bound whalers or tend sick and injured at remote Eskimo outposts.

Each of the five coast guard boats cruising in and out of rocky fjords or through ice does in a store, post office, police court, battleship and hospital, all in one.

The story of Alaska is associated closely with the coast guard, for in 1867, when Secretary of State William H. Seward bought the vast territory, it was the old cutter Lincoln that was sent to survey the new possession.

Many thrilling rescues in the far north are part of coast guard history. In 1884 the old cutter Bear saved the lives of Gen. Greeley and his men—the same general, now ninety-one, who was rewarded this spring by congress for his Arctic explorations.

Another dramatic rescue by the Bear was that of the crew of the foundered whaling ship Napoleon, in 1890. Information of the Napoleon's plight, scribbled in Eskimo on a piece of board, was passed from village to village, until it finally reached the Bear.

The coast guard brought the first reindeer to Alaska from Siberia in 1900 and under its watchful eye the Pribilof Island seal herd has increased by more than ten times in the last 25 years.

One cutter will make two hasty trips to Point Barrow this summer, carrying supplies to government employees at that remote station. Two will follow the Bering sea seal herds to protect them from poachers. The others will patrol villages and aid fishermen and shipping, if needed.

Romanoff Has Modest Home Near Pittsburgh

Pittsburgh.—Gregory Romanoff cherishes no delusions of the grandeur he and his wife once knew.

The son of an officer in the czar's imperial army, reconciled to the loss of his ancestral estate in Russia, he has received his first naturalization papers.

With his wife and four daughters, Romanoff lives in a modest four-room dwelling in the nearby borough of Homestead, and ekes out an even more modest living by teaching Russian at church schools and directing choral groups.

Of necessity, the daughters will be denied the advantages of luxury and of education in exclusive seminaries such as their parents knew in an Ukrainian province years ago.

Romanoff makes no pretense of royal lineage, although he traces the family name to Alexander the Third. His father once was asked by the czar to change his name in order that "Romanoff" might be reserved for the royal family. But his father declined, even though a handsome cash settlement was offered.

When rumblings of the revolution broke upon the Russian scene, Romanoff and his bride fled by different routes to Canada. Their wretched home some day to reclaim their home vanished with the Soviet rise to power, and they settled here.

Here's Absent-Minded

Professor Lost in City

Cleveland, Ohio.—Here's a true "absent-minded professor" story: Though Dr. Paul A. Biefeld, retired professor of astronomy and director of Swasey observatory at Denver university, has traveled worldwide, he came up here from Granville, Ohio, got lost from relatives and friends and didn't know what to do.

He had attended the theater with his wife, daughter and friends. Somehow he became separated from them. He forgot his daughter's address. It didn't occur to him that her address would be in the telephone book, so he spent the night in the Y. M. C. A.

Relatives, distraught, asked police to look for an amnesia victim. Doctor Biefeld's safety was not established until finally he telephoned a friend. He occupies several lines in "Who's Who in America" and is an astronomical authority.

Wanted Youth Found Caddying for Judge

Port Arthur, Texas.—Deputy Sheriff Claude Goldsmith and T. G. Pool put in a hard day recently searching for a youth who was wanted on an old burglary indictment.

They went to his home several times and searched all places the youth frequented, but with no results. Finally, they decided to wait at his home until he returned.

Upon their arrival they found him, less than five minutes after Criminal Judge R. L. Murray, who was to hear the case, had left him there.

The boy had been caddying for Judge Murray while the officers searched.

OLD TIME WHALERS GIVE WAY TO STEAM

Modern Methods Easier, but Risk Still Remains.

Seattle, Wash.—The old whaling vessels, huge and cumbersome, carrying a nest of small boats to search out and kill the whales, as well as all necessary implements for "trying out" the blubber, have all but disappeared from the famous whaling grounds in the Bering sea. Still common in antarctic waters, they are seldom seen in waters about the Aleutian Islands. In their place have come small, snub-nosed "steam whalers."

Fourteen of these modern ships are roaming the cold Bering sea. With a 200-ton gross displacement, each carries a Sven Foyn gun mounted on a high and flaring bow. No more do men row away from the motor ship in search of whales; with the modern gun and high speed, each vessel seeks out its own whales and shoots the harpoon from the bow gun.

The gun throws the harpoon, four feet in length and weighing a hundred pounds, from 30 to 40 yards. Behind the barb of the harpoon is a cap, containing a charge of explosives timed to go off three seconds after the harpoon has struck. The whales do not often run with these appliances; the "strike" is usually fatal.

Processed on Shore.

One of the great dangers of the older methods of whaling was that of fire. The blubber was "tried out" or cooked down, in great kettles carried aboard the ship. The crews turned from hunters to butchers and "cooks," and the whale was reduced to oil and whalebone aboard the ship, to the accompaniment of an unholly odor and the constant danger that one of the cooking fires might get out of control and destroy the vessel.

Under modern methods factories for processing the whales are established on shore near the whaling areas. When a whale is killed it is inflated with air and marked with a flag. After the day's catch is completed the dead whale is hauled up and towed to shore, where the factory carries on the oil producing processes with a much greater efficiency than was possible under the old methods.

It's Still Dangerous.

Not all the danger and the excitement has gone, though, from the actual killing of the whale. So testified Capt. Peder Onnes of Kodiak, master and gun man of one of the Bering sea whalers, when he said:

"It's just as dangerous as it used to be. Nobody has an easy time standing on the deck beside the gun, in a heavy sea—and the gales are bad off the Aleutian Islands. The whale slips up for as long as you can say 'scat' and you are supposed to shoot him now. That is hard to do."

But the Bering sea whalers were jubilant as they started out this year. Prices on whale oil were double what they were last year and the prospects for a large catch were good. Best quality oil is used for soap making, while sperm oil, which comes from the head cavities of certain types of whale, is used in perfumes and medicines.

Only one company, that of William Schupp, known as the "whale king of the Pacific," operates in the Pacific whaling industry. The company operates seven boats from Seattle and seven from Canadian ports. Last year they got 814 whales.

Wales Proves to Youth He's Really a Prince

Vienna.—The prince of Wales sent a magnificent toy railway and a personal card to little George Schmid, living in the Vienna Karl Marx Hof, and proved himself a prince.

When the prince of Wales was in Vienna he visited a number of workmen's apartment-houses, among them the Karl Marx Hof, the headquarters of the Socialist Schutzbund during the revolution of February, 1934. On his rounds he came to the kindergarten, in which little George, son of an unemployed man, was playing with other children.

"Get up and make your bow to the prince," the boy was told.

Little George, however, replied with the self-assurance of his five years. "This isn't a prince, for he hasn't a crown."

The heir to the British throne didn't forget the only person who doubted his identity in Vienna.

Little George believes now in the genuineness of the visitor.

Liberty Statue to Have Birthday Party in 1936

Washington.—American citizens have been invited by the national park service to participate next year in a program which will mark the fiftieth anniversary of the Statue of Liberty.

The monument was unveiled on October 28, 1886. The nation shared in the ceremonies.

The park service has requested that everyone interested in the semi-centennial celebration assist in locating and assembling poems and pictures of the statue which were published at the time France presented the memorial.

It was pointed out that many of those pictures and illustrated accounts were "striking and artistic, lending themselves admirably to effective reproduction."

Authors who wrote poems during the dedicatory period included: John Greenleaf Whittier, Ella Wheeler Wilcox, E. C. Stedman, Charles Barnard, Esther Singleton, John J. Garnett, Sidney Herbert Pierson.

MAPS FEATURE NAME OF PONCE DE LEON

Famed Spanish Explorer Hero of Caribbean.

Washington.—Excavations beneath the Cast Blanca in San Juan, Puerto Rico, have revealed ancient foundations, once part of Ponce de Leon's palace. The present structure, though popularly known as his residence, was built a few years after his death.

"Modern biographers have neglected Juan Ponce de Leon," says the National Geographic society. "He is mentioned only occasionally in the documents and records of his day; but the events of his life are written deep in the geography of the New world he helped to create. His sturdy figure stands in sculpture in the city square in San Juan and again in St. Augustine. His name appears on every map of the Caribbean. There is San Juan, capital of Puerto Rico; Ponce, the second town of importance in the same island; and Ponce de Leon bay, cut into the southern tip of Florida."

Port of Riches.

"Ponce de Leon probably sailed westward with Columbus on his second voyage in 1493. On their way to Hispaniola (the island of Haiti) they coasted past the shores of Puerto Rico, giving the young soldier a first glimpse of his future home. Trained in the Moorish wars, John Ponce was successful in subduing the natives of Hispaniola, and was shortly made governor of Higüey, the island's eastern province. From his headquarters on the east coast he could look across the Mona channel to the blue peaks of Puerto Rico. Rumors of gold, hidden in those mountains, lured him across the channel. There he found rich lands, friendly Indians, and the promised gold. With this newly acquired wealth it was easy for him to secure appointment as governor of the island. To him it was truly 'Puerto Rico'—'Port of Riches'—and so he named it."

"By enslaving the Indians and exploiting the island's natural resources, John Ponce soon amassed a fortune. He built and fortified the town of San Juan, erected a magnificent palace overlooking the harbor, and ruled his lands sternly. His first ally in all campaigns was a remarkable dog named Berceillo. This bloodhound was more feared by the Indians than was his master. It was a great blow to John Ponce when Berceillo was killed in an encounter with the Caribs of Guadalupe."

Bought Fountain of Youth.

"A change in political parties deprived the governor of office. New rumors had reached his ears, not of gold this time, but of a fountain of youth, which the Indians said was on the island of Bimini, to the north. "So John Ponce fitted out three ships and sailed forth on his romantic search. He cruised past the Bahamas, found no spring, but discovered the Bahama channel, a route used thereafter by Spanish treasure ships. Steering north and west he reached the coast of Florida on Easter day, naming it for 'Pasqua de Flores.' Ponce de Leon had a lively imagination, and chose romantic names for the lands he discovered. He probably landed first near the St. Johns river, then coasted south around the peninsula and north, perhaps as far as Pensacola. When he sighted the Florida Keys, he christened them the 'Martyrs.' He also found and named the Dry Tortugas, where his men caught 170 turtles in one night! Nowhere did he find the spring that he sought, but the legend persisted, and before long there was scarcely a puddle or stream in Florida that had not been bathed in by optimistic Spaniards and Indians."

"When Ponce de Leon reported his discoveries to Ferdinand he was appointed governor of Florida, and commanded to found a colony. For seven years he was delayed by wars with the Caribs; but in 1521 he sailed out of San Juan harbor with two ships loaded with men and supplies for a permanent settlement. Good fortune had deserted him, however; hostile natives attacked the party as soon as they landed, and Ponce de Leon was wounded before they could reach their ships. He died soon after they reached Cuba, and was buried in San Juan."

"Relic of True Cross"

Is Found in California

Hollister, Calif.—What is claimed to be a relic of the true cross, on which Christ was crucified, has been found in the archives of old San Juan mission.

Father Francis Caffrey said the relic was authenticated by a letter found with it. The missive was signed by Bishop Johannes Maria Odín, conference of missions, Rome, and was written to Bishop Thaddeus, O. M., of Monterey in 1852.

The cross is composed of two tiny slivers of wood forming a miniature cross about one-quarter inch in size and contained in a larger silver cross encased in silver and with a glass aperture through which the relic can be viewed.

Police Short Wave Is Great Aid to Wreckers

Bridgeport, Conn.—The police short wave radio broadcasting station has proved a boon to automobile towing companies. Several concerns have equipped their wrecker trucks with radios. Many times a police car or ambulance has arrived at the scene of an accident to find several of the "wreckers" ahead of them and all ready to haul away the debris.

"DIFFERENCE"

By EDYTHE S. DRAPER

© D. J. Walsh—WNU Service.

GAY. How gay. The woman stopped her slow pacing of the pebbly seashore. Her eyes had been on the ocean. Now they were on the gay house, small, quite alone by the sea in the yellow sand.

Blue-gray stones piled in two pyramids in the two green rectangles of lawn were entwined by a thousand oranges and yellow and flame-bright nasturtiums. Geraniums, deep-crimson, scarlet, salmon and rose-pink, stood straight and stiff and splendid in pots along the stone embrasures of the porch.

The house was painted an incredible exquisite pink. Shells, pink and white, set one against the other, outlined the gravel path from the pink gate in the pink fence to the pink lawn. And the ocean was blue the woman knew though she did not turn her eyes from the house. And the sky was blue, Gay, gay, sky and sea and flower and house. The woman felt a little gay lightness in her. She felt able to venture.

"I will have this house," the woman murmured. "I will go in now and take it. The doctors, they are wrong. Six months? No. Forever, in this house."

She opened the gate. It was low. She could almost have stepped over it. It was a toy fence, a toy house, toy flowers, all for a good child. She was it, that good child. She would, with much, much money, make the people know that.

"I will have this house," she said again firmly.

Who could be living here? Far from boarding-house and hotel and palace-cottage?

In such rash gaiety? Did they not know that the gods are jealous of the very happy? People very young and brave, belike, these were loving color and breeze, and each other.

She had used to come to this piece of sand. Yes, away up here. With Angus.

When in years now had she thought of Angus? Angus the sailor? He was dead perhaps in some far city, low in some still green sea. But, no. Too stubborn Angus to die. Old stubborn Angus. Old Scotch, stubborn Angus. "You can't talk English," she had scoffed, "Difference? Can't you say difference?"

"Hey!" he had roared. "I don't see any difference between difference and difference!" "Very well, then, Mr. Angus! Good-by."

She had laughed and gone. She knocked.

Anybody in the house wanting to analyze the sound of those white knuckles on the tiny door would have said it was the knocking of some woman getting in always where she wanted to get in, having always what she wanted when she got in, but yet not often glad.

Perhaps one in this house was discussing with himself this knock, coming perhaps to some conclusion about it. For the door remained closed. The woman stood before it and a flush came up into her cheeks, making them young.

She knocked again hard. The door remained closed. A third time she knocked and tears were in her eyes as she turned away.

Then the door opened. A man robust and vital and compelling stood smiling at the woman. He wore a velvet coat. He had a white beard. A pink rose half-blown was in his buttonhole. He had a cork leg. He was no one she had ever seen, the woman said to herself. His eyes were very blue, his cheeks pink. Gay and content seemed he.

"Good morning! Come in! He stood aside a little and the woman entered the pink toy house."

Sunshine filled the house coming in through many windows. The sunshine had a gay rainbow sheen because it came in by so many green leaves and flowers in the house. It glinted on a clear large round bowl of goldfish. It sparkled up the feathers of greenish birds flitting among orange trees and ferns and oleanders.

The inside walls of the house, the walls where no windows could be were like a museum. Plaques were on them from China, kakemono from Japan, fat gods from India and a lovely Taj Mahal; ivory and ruby-encrusted scimitars from Turkey, monkeys and parrots, stuffed, lifelike, grotesque, from Africa, small, ungazed, richly earth-colored pottery from Central America, colored pottery from Malaysia. On small mirrors mahogany tables bits of porcelain and coral and intricate inlaid fragrant boxes holding treasure. The woman's eyes sparkled, her cheeks were deeply flushed. She felt young, not ill.

"I will take your house," she said breathlessly.

The man's eyes sparkled, too. The lips under his very white beard twitched.

"The little house? But, please, it is the lunch hour. If you will sit for a moment."

"Oh—I do not eat."

"But I do! I am agreeable after lunch. I may give my house away, after lunch."

He opened a door and went out. She sank down against golden embroidered cushions in a long low chair of bamboo.

The ferns waved their lacy fronds in the wind from the sea.

The oranges and oleanders breathed forth fragrance. The goldfish swam delicately appreciative of their own brilliant beauty in the reflecting translucent depths of their coral-caverned lagoon.

The birds preening their emerald and yellow feathers on perches among the ferns in the sun twittered out little upward-sliding chirpings.

The woman's eyes were taken from this to that.

They had no chance to turn inward, to peer into her own sore soul.

A splendid house the woman had in the far city, a darkly splendid house with many grand rooms. In that house one's thoughts were pressed into oneself.

"Oh, you'll take the high road and I'll take the low road."

BYRD'S SHIP BOASTS REMARKABLE RECORD

Service and Adventure Written Large on Log Book.

Washington.—The Bear of Oakland, sturdy steamship which brought Rear Admiral Byrd and members of his expedition safely back from their year long vigil in Antarctica, has a name that sits the hearts of sea dogs," says the National Geographic society.

"Gales and high seas of three-score years have whipped over the broad decks of the barkentine, but like punches bouncing off the unyielding shoulders of a heavyweight champion, all have been turned aside," continues the bulletin.

"Adventure and service to mankind are written large in the pages of the Bear log-book. No polar explorer lives who is not familiar with her stout career, and several there are who have paced her staunch oak decks—Byrd, Greely, Stefansson, Amundsen, and Capt. 'Bob' Bartlett, to name a few. She was the first to meet Lieutenant Greely marooned on the Arctic ice in 1884.

"Her crew maintained law and order in the frozen outposts of America during the Alaskan gold rush, long before radio had come into general use. Her commanding officers were often called upon to conduct funeral rites and marriage ceremonies during the long period of her service in the U. S. Coast Guard, from 1880-1928.

Built in Scotland.

"Whaling men knew and loved her for the occasions on which she went to their rescue in the icy fastnesses of the North. When the bark Napoleon was wrecked in the ice near Cape Navarin, Siberia, the Bear put out to sea immediately, following a route described on a piece of board passed from one native village to another.

"She has schooled many salty seamen in the uncharitable ways of ice, wind, and ocean. A dozen of them reside in the City of Washington today. Rear Admiral H. G. Hamlet, present commandant of the U. S. Coast Guard, served three assignments aboard 'the old Bear' as he affectionately recalls her. His assistant, Capt. L. C. Covell, was the skipper of the Bear in 1925 and 1926.

"A barkentine with auxiliary steam power, the Bear was built at Greenock, Scotland, in 1874, for service in the whaling trade. Constructed of solid oak, she is strongly braced to cushion the shock of ice. She is 200 feet long, weighs 703 tons, and has a depth of 18 feet, and a beam of 32 feet. When the United States government wanted a real boat to bring Greely out of the Arctic, the Bear seemed a logical purchase.

"Reinforced with additional beams, iron straps, and Australian iron bark, the Bear, commanded by Lieut. W. H. Emory, U. S. N., and a volunteer crew of navy men, set out with a relief expedition under Commander Winfield Scott Schley. Schley was the commodore who later led the famous Flying Squadron against Cervera during the Spanish-American war. The Thetis and the Alert went out after Greely with the Bear.

Rescued Greely.

"Speed and ruggedness made it possible for the Bear to reach the Greely party first. Her arrival was none too soon. Only seven of the 25 men who set out with the explorer were alive when the Bear crew reached them in the summer of 1884. There are few more thrilling tales than the story of this gallant rescue in the frozen Arctic. Greely was brought back to Portsmouth, N. H., in August on Commodore Schley's boat.

"The Revenue Cutter service which is today U. S. Coast Guard, received the Bear for service in Alaskan waters and the Arctic ocean. Here began its long career of rescue and patrol work, after which it was donated to the City of Oakland, Calif.

"Admiral Byrd bought the Bear, now the Bear of Oakland, in May, 1932. Refitted at Boston, it sailed with the Byrd Antarctic Expedition II."

Circus Elephant Retired to Zoo Quiets Upstart

Washington.—Everything has been quiet in the elephant house at the Washington zoo since Old Babe made Peaches behave.

Old Babe is veteran circus trumper who was a queen of the picket line before Barnum flourished. She recently went into retirement here.

Zoo officials found themselves in a quandary when they tackled the problem of how to keep Old Babe from being lonely after her 50 years as boss of an elephant herd.

The only available companion for the queen was Peaches, a husky eighteen-year-old "bad actor" from the wilds of the Malay archipelago. Peaches was a natural born bully, who outweighed Babe by several hundred pounds and knew no master.

Officials realized, however, that Old Babe had placated more than 100 unruly upstarts in her time. They decided to put her in with Peaches.

The young bully started at Old Babe, head down.

Old Babe took one light slap at the upstart with her trunk, a light practiced slap that loosened a tusk and gave the youngster a pause.

Then Old Babe trumpeted a soft command, a rumble which issued from deep within her body. It was elephant talk, and it told the youngster something she understood at once.

PLAN TO RESTORE OLD COOLIDGE HOME

May Be Preserved as Historical Monument.

New York.—Mrs. Calvin Coolidge reveals a plan to restore the old Coolidge birthplace in Plymouth, Vt., where Calvin Coolidge became President by kerosene light, for preservation as an historical monument. His widow states in the June Good Housekeeping, that John G. Sargent, attorney general under Coolidge, heads a committee now proceeding with the project.

"There could be no more fitting memorial to our thirtieth President," Mrs. Coolidge says, "nor one which would be more in keeping with his natural taste. Undoubtedly he gave some consideration to the matter himself and for that reason made extensive repairs. In building the six-room addition to his father's house, he was particular that no change should be made in the original structure."

Coolidge's only monument today is a simple five-foot granite stone in the Plymouth cemetery, similar to that of his son, Calvin, Jr., but Plymouth Notch itself, with its country store, church, Coolidge homestead and cheese factory is so identified with Coolidge that it attracts tourists in increasing numbers.

"While Father Coolidge was alive he welcomed visitors to his home," Mrs. Coolidge relates. "Invited them into the sitting room, and posed for innumerable pictures. Since his death the housekeeper has continued to admit callers as generally as her time and strength have permitted. Women in the vicinity have brought pieces of their handwork for sale. I think that Mr. Coolidge refrained from placing a ban upon this because he realized how much it meant to these people in an out-of-the-way community to realize a little pin money."

The Coolidge correspondence, written with proverbial Coolidge caution, is already filed in the Library of Congress. Charles A. Andrews, treasurer of Amherst college, in the same issue of the magazine says Coolidge once said to him:

"They will not find any 'Dear Maria' letters among my papers. I did not have any private or semi-private correspondence. I brought nothing home with me."

A typical non-committal Coolidge letter is quoted: "My dear Mr. Field: Thank you for your letter of the twenty-first instant. I shall certainly have your views in mind when I come to act upon this matter. Calvin Coolidge."

Mr. Andrews also recalls this prophetic statement Coolidge made four days before his death:

"I am too old for my years. I suppose the carrying of responsibility as I have done takes its toll. I'm afraid I'm all burned out."

Cattle Brand by Shaw for Texan's Collection

Plainview, Texas.—Two years of patience have been rewarded and Marion Peters, Plainview's collector of cattle brands, is in possession of a brand drawn by George Bernard Shaw, stormy English author.

Peters' first request met with a reply that branding was cruel. Then how would Mr. Shaw do it?

"Paint it on, you idiot. You can put your name on your handkerchief without using a red-hot poker can't you?"

Finally Shaw capitulated and drew the brand. Further, he even drew a cow for the brand.

Peters' collection now contains brands drawn by President Roosevelt, Will Rogers and Postmaster General James Farley.

Poison Gas Now Is Used to Save Old Churches

Vienna.—Poison gas for preservation purposes is being used in Austria, especially on old wooden churches and church furniture.

The first such "gassing" was applied to the Kasermarkt church in upper Austria, with such success that the church at Mauer, near Loosdorf in lower Austria, is being given the same treatment.

Each gassing costs approximately \$2,000. Its purpose is to eliminate destructive wood insects which cannot be destroyed by any other known method.

Mouse Broadcasts Howls; Police Operator Frets

Wichita, Kan.—A mouse broadcast for two days over Wichita's police station, practically driving Dispatcher "Bing" Crosby nuts. No one knew the cause of the distortion that made the radio howl until Sgt. Ray Mitchell got to looking about. He found the dead mouse in the transmitter.

Gander Is Constant Companion of Man

Royalton, Wis.—A senile gander of doubtful ancestry, believed to be old enough to vote, is the unusual pet and constant companion of Charles Frey, retired farmer and former village president of Royalton. Frey's gander embodies all the characteristics of a dog. He waddles at his master's heels all about the barnyard, does sentry duty in front of the house, heralds the approach of intruders with shrill cackling and hissing, and displays dog-like devotion.

HUNT FOR OIL THAT ENDURES FOR AGES

Ingredient Used by Indians in Mixing Paints.

Washington.—Search for an oil which forms a basic ingredient of paints which are known to have withstood exposure for at least 150 years on the unprotected faces of mountain cliffs in southern California will be one of the objectives of Dr. John P. Harrington, Smithsonian Institution ethnologist, when he resumes his field work among the Mission Indians.

By extensive inquiries among the Indians last fall, Doctor Harrington confirmed the fact that this oil is pressed from the seeds of the chillicothe, a species of wild cucumber. It is now quite rare, but grows in the southern California mountains in places known to the Indians. Formerly, closely related plants were found over most of the United States, but they have become very scarce.

Doctor Harrington will try to obtain enough of the chillicothe cucumbers to yield a sufficient supply of the oil for experimental purposes, to determine whether it is this ingredient which gives the paint its remarkable lasting quality. The Indians obtain it in the crudest sort of way, merely crushing it out of the seeds with a stone pestle.

Five Colors Obtained.

Using this oil as a base, five colors of paint are obtained. Red pigment is manufactured by mixing the chillicothe oil with red scum from the surface of springs whose water contains a high percentage of iron. White and yellow paints are obtained by mixing the oil with native clays of those colors. A black, which retains its gloss for years, is made by mixing the oil and oxide of manganese. Blue can be obtained from a mixture of the oil and powdered azulite—a mineral common in the neighborhood.

Apparently, no other substance enters into any of these paints, which withstand all the vicissitudes of weather literally for centuries.

These rock pictures are referred to by the Indians as "spirit paintings." Fresh ones still appear from time to time in the depths of the mountains. Near the missions are some which are known to be at least 150 years old, having antedated the coming of the Spanish missionaries.

"Spirits" Work at Night.

The "spirits" always work during the night, their handiwork appearing in the morning. The paintings, of course, are the work of medicine men. The attitude toward them of the people as a whole is a curious mixture of belief and sophistication. Few actually believe that "spirits" produce the pictures, but some still hold that they are the work of supernatural agencies working through the medicine man. It was from work of the shamans themselves that Doctor Harrington obtained the formulas for the paints.

The oil is also used extensively by the Indian women as a sunburn lotion. These women, in spite of their red skins, burn badly when exposed to the summer sun for long periods. The oil presumably not only absorbs those wave lengths of the solar spectrum causing sunburn, as do many preparations regularly sold for the purpose, but also tends to make the skin redder. Itedness is considered an attribute of beauty.

Head of Confucius Clan Gets New Sonorous Title

Nanking.—The title of Holy Duke, which has been borne for more than 2,000 years by lineal descendants of Confucius, is to be changed, by order of the Nanking government.

Hereafter the head of the Confucius clan, who lives in southern Shantung province near the tomb of the famous sage, will be known by the honorary title of the Sacrificial Official for the Late Teacher, Confucius the Sage. The same order also abolishes the title of "Fu Sheng," hitherto borne by all descendants of China's greatest four sages, Confucius, Mencius, Tzeng Tzu and Yen Yuan. Hereafter they will be known as Sacrificial Officials for the Four Sages. The descendants of the four sages are to be educated at the expense of the central government.

Girl Dances While Her Skin "Turns to Stone"

Tacoma, Wash.—The eyes of the medical world were turned toward Roy, a little community near Tacoma, as physicians puzzled over the amazing case of Nona Cloyes, nineteen-year-old high school graduate, who is slowly "turning to stone."

"She is suffering from the rare and dreadful disease, scleroderma. Still looking the picture of health, however, she dances and does the things that any normal girl does."

But her cheeks, neck, chest and other parts of her body are hard to the touch as firm and cold as iron. Some slight improvement had been noted since the girl was placed on a severe diet in which mineral-giving foods were excluded.

Makes "Face" at Sister and Disjoins His Neck

Nelson, Calif.—Small Curtis Terrell, to frighten his young sister Albertine, "made a face at her." So perfect was small Curtis' Terrell's pantomime that he not only sent his sister screaming, but he also threw a neck vertebra out of joint and had to be taken to the hospital.

Lights of New York

by L. L. STEVENSON

New York's "slave markets" are in the Bronx. Every day colored women, old and young, line up at Westchester avenue and Southern boulevard and at Prospect avenue and East One Hundred and Sixty-first street, to sell themselves into temporary bondage at so much an hour. Ragged, down-at-the-heel, hungry, they await the appearance of possible purchasers of their services sometimes with chatter and laughter but more often with grim silence. There is no assurance of employment and the walk to and from Harlem is long, especially when the stomach is empty and the shoes so thin that feet all but touch the concrete. The "slave market"—those who line up and wait supplied that name—is the last hope. If an employer doesn't come along, there will be more hunger and possibly eviction, since Harlem landlords do not care to wait for their rent.

Those who make purchases at the "slave market" are housewives of the vicinity. Shrewd in bargaining, desiring to make every penny count, their offers are always low. Follows an auction of sorts. But the one with work has all the advantage. Household tasks may await another day but hunger—and landlords—won't. In the end, there is capitulation to take need makes it seem better to take from 12½ to 15 cents an hour for hard and heavy work that in good times brought 50 cents an hour, than it is to walk back to Harlem penniless. Also the employment is only temporary and there is always the hope—seldom realized but hard to kill—that there will be a change for the better.

One of the biggest reasons for the existence of the "slave markets" is the fact that there are practically no jobs for colored men. Jobs such as porters, waiters, washroom attendants, messengers, etc., that once were filled only by colored men have been taken over by whites since the depression. Harlem mothers and wives, as well as single women, have always worked. But present conditions have placed an additional burden on them. So they line up and wait at the "slave markets."

Speaking of colored people, there was the little girl in the school out at Long Island who told her teacher her name was "Fee-mal-ee" Jones. Asked to spell the first name, she replied, "Female." It seems that when she was born, her parents were unable to decide on a name, so at the hospital the blank was filled in (Female) Jones. The parents taking that as official, from then on called her, "Fee-mal-ee."

Related the foregoing to a friend whereupon he recalled a somewhat similar instance which concerns a woman quite well known among the Seven Million. In connection with birth proceedings, she had to obtain a birth certificate. Trouble ensuing in looking it up, she explained that her parents had first decided to call her Olive. But because she was so fair-complexioned, they had changed the name to Lillian, after Lillian Russell, the "air, fairy" of that day. And search disclosed the fact that she was merely listed as "Female."

Dealing a bit more with names, it seems that bartenders, barbers, waiters, pullman car porters and others are generally called by any name that comes to the mind of the patron. A lot of places in New York have solved that problem by neat plaques which announce "George now working," or whatever the name of the man behind the stick may be. So when a patron addresses the barman as, "Mac," he merely points to the sign.

Plea Made for Snakes That Destroy Rodents

Topeka, Kan.—Non-poisonous snakes are a boon to farmers and worth many dollars each for the work they do in killing rats, weasels and other rodent pests, according to D. P. Beaudry, director of the Topeka Reptile Study club.

Beaudry, in a plea that harmless snakes be spared, said that when a snake is seen near the farm buildings it usually is trailing some rodent.

"If food is scarce a snake occasionally may kill a small chicken," Beaudry said, "but a rat or weasel will kill more small chickens in an hour than a snake will in years. A snake more than earns an occasional chicken for the good work it does in killing pests."

House Built in 1793 Razed.—Winston-Salem, N. C.—A 142-year-old landmark has been torn down here. It was a nine room house built in 1793 by Romulus Tesh. Its timbers, all hand hewn, were reported "remarkably preserved."

Red Tape Is Fatal to 14-Foot Python

San Diego.—Red-tape, which annoys people, killed a 14-foot python. With five other pythons the snake arrived from Singapore for the Pacific International exposition. The bills of lading were sent in error to Chicago and customs officials would not let the snakes off the boat. By the time the bills of lading arrived the 14-foot python was dead. The others were sluggish and thin, but will live.

FRENCH FEAR CURSE IN MAN MADE GOLD

See Civilization's Fate at Inventor's Mercy.

Paris.—Will the world welcome the invention of a powerful death ray? How will men greet an invention which will permit anyone to produce gold at home cheaply?

Will not these discoveries mean the end of our civilization? These are questions that Frenchmen in all walks of life are asking themselves these days as the result of the announcement of Jan Dunkowsky, Polish engineer and "modern alchemist," that he has achieved the two discoveries. He has already proved to one expert his ability to make gold cheaply, and he has demonstrated to journalists the effectiveness of his death ray, on a reduced scale.

Everything in France ends in laughter, but the French amusement at Dunkowsky's original experiments is beginning to be turned into a feeling of annoyance.

During those two years that Dunkowsky spent in a Paris prison for having falsely claimed that he could produce gold, the public laughed good naturedly at him and looked upon him as just an eccentric. During those two years Dunkowsky was allowed to leave his cell and visit a city laboratory, where he worked to prove that he was not a swindler.

Takes Refuge in Italy.

After serving his time, Dunkowsky took refuge with his family in a villa at Saint Remo, Italy, where he continued his experiments. He wanted eventually to prove that he was not a fake and then have his conviction in the French courts reversed.

Recently, Maître Legrand, his attorney, announced that Dunkowsky had achieved his goal. Monsieur Bonn, a chemist attached as expert to the French law courts, went down to St. Remo. He spent six hours in Dunkowsky's villa applying the Pole's method to auriferous earth. At the end of the experiment, Bonn issued a statement declaring that in his opinion the technique devised by Dunkowsky did in fact extract a larger quantity of gold from the earth than would be possible by methods now in use.

Bonn said no fraud was possible. He made a careful examination of the apparatus beforehand. The earth brought by Bonn was divided into three lots. Dunkowsky's "Zeta" rays and then complicated chemical processes were used on the first lot of earth, as the result of which two small globules of gold emerged.

The second lot produced no gold because it was not submitted to the Zeta rays even though it underwent the same complicated chemical processes as the first lot. The third lot was submitted to the rays but to no further treatment. This lot is being sent to Paris for examination.

Tells How Rays Work.

Dunkowsky explained the action of the Zeta rays as follows:

"The bombardment of the gold by the rays causes it to mature from its 'embryo form' in a quarter of an hour instead of in the great number of centuries required for this transformation hitherto."

Bonn says the Dunkowskys have been living by their gold production for the last two years.

Not content with his gold making, Dunkowsky suddenly offered to France the invention of the death ray in exchange for his rehabilitation in a rehearing of the trial which condemned him for fraud in connection with his invention for extracting gold from auriferous earth. The same newspaper men who had been crowding into the villa to make gold now crowded back in again to see another demonstration.

Dunkowsky explained that airplanes could be brought down with his death ray by using two streams of rays and crossing them on the object aimed at, thus producing a short circuit. He tried the trick on a toy airplane and it burst into flames.

Lives in Covered Bridge, Woman Has 5 Addresses

Boston.—New Hampshire has a resident who lives in one place and has five addresses. To reach her by mail one sends a letter to Penacook. For a telegram the address is Bosawen. To find her in the telephone directory one must look under Salisbury. A visitor going to her home by rail leaves the train at Bagley. And all the time she lives in the town of Webster.

Her house carries a sign. "This bridge is closed by order of the court." She found the old covered bridge on private land, bought it, moved it to land she owned, reduced its length and fitted it to foundations already in place and put it in order for occupancy.

These Pigeons Jump to Maturity in Four Days

Santa Barbara, Calif.—Pigeons jumped from babyhood to maturity in four days under pituitary gland treatment in an experiment at a hospital here.

Under normal growth pigeons do not develop lacteal glands, the sign of maturity, until they are several months old. Birds six weeks old, just leaving their nests, developed the lacteals in four days when treated with the pituitary hormone.

Guinea pigs are next in line for speedy development.

CONNECTICUT WIPES OUT OLD BLUE LAWS

Severe Penalties Dropped for Many Offenses.

Hartford, Conn.—One by one, during the 300 years that Connecticut has outgrown its original settlement founded by a small band of pioneers from the Massachusetts bay colony, the "blue laws" which ruled with an iron hand have been erased from the statute books.

The tercentenary celebration of the state sent many poring over the pages of history. They found in early days that the death penalty could be inflicted for:

Stealing an ear of corn from a neighbor's garden.

Blaspheming God.

A youth sixteen years or more to strike or curse his parents.

To be a stubborn or rebellious son.

Return to the colony after being banished as a Quaker or a Roman Catholic priest.

Witchcraft, treason or adultery.

And, it also was found that they were called "blue laws" because they first were written upon blue paper. The Sabbath was strictly observed. One was not permitted to saunter about in the garden, kiss his wife, or a mother kiss her child; all household duties were abandoned, except eating, and all food had to be cooked at least the day before. The Sabbath began at sundown Saturday night.

The general court dealt severely with scandal mongers. Early offenses were punishable by fines. Repeaters went to the stocks and chronic offenders faced a magistrate's court after a public whipping. The magistrate's court invoked the death penalty.

Before the laws were reduced to writing, the town crier announced them in a public place at regular intervals.

In case it was found a law had not been made for some specific offense, the violator was judged under this concluding clause in the fundamental law of the colony:

"For want of a law in any particular case he shall be judged by the word of God."

There is no record of such judgments.

Tourist Parties to Use Famed "40 and 8" Cars

Paris.—Freight cars of the type which American soldiers rode during the World war are to be utilized as "tramping camp cars" for tourist parties. It is announced.

Several hundred of the cars labeled, during the war, "horses, 8; men, 40" as an indication of load capacity, are to be painted white inside and outfitted with cookstoves and hammock hooks and rented to parties of from six to ten persons at about \$1.35 a day or \$20 by the month.

The cars will be hooked to freight trains for travel anywhere. But if desired, the campers may buy third-class tickets and have their cars attached to regular passenger trains.

The old labels, "horses, 8; men, 40" will remain, and a third line added: "Campers, 10."

Nebraska Expert Calls Real "Quake" Possible

Lincoln, Neb.—It is possible, but not highly probable, that Nebraska sometime may experience an earthquake of destructive intensity, according to Dr. A. L. Lugh, associate professor in geology at the University of Nebraska. Lugh made a study of conditions as a result of tremors which rocked Nebraska early this spring.

"It is evident that the region affected by the recent tremors in all probability will experience mild disturbances from time to time. It is also possible but not very probable that it may sometime experience an earthquake of destructive intensity," Lugh said.

Alibi Runs Speeder to Hospital, Then Court

Cleveland.—A "perfect alibi" failed, so John Gilbert had to appear before Police Judge Jacob Stael to answer charges of speeding 64 miles an hour down an East side street here. When a motorcycle policeman stopped Gilbert, the latter said he was taking his wife to a hospital. Huston sped ahead of the Gilbert car with siren screaming, clearing the way of traffic and pedestrians. At the hospital, attaches said Gilbert had made no reservation, doctors said nothing was wrong with Mrs. Gilbert, and Huston booked Gilbert for speeding.

Bowler, 80, Rolls 555

Memphis, Tenn.—Memphis bowlers, celebrating in honor of their oldest adherent of the sport, were treated to an exhibition by Jim Kelly on his eightieth birthday. The elderly man rolled three games—100, 171 and 224—for a total of 555.

Liner Is Shaken Up by 18-Foot Shark

San Pedro, Calif.—The fruit liner Antigua docked from a Central American cruise with a tale of having bumped into a shark off Cape San Lucas that was so big the ship shook.

Capt. Edwin Beyer said the bow barged into an 18-foot tiger shark squarely, and the sea raider was impaled so firmly that he had to stop and put the ship in reverse to shake it off.
